CANTON GENERALS DEPART

PROTEST AGAINST
CIVIL WAR

COMING TO
HONGKONG

Canton, July 11.
Another political surprise has been caused in Canton by the announcement that three high officials, Li Kit-chi (Commander of the Bocca Tigris Forts), Wong Tao (head of the First Kwangtung Army Arsenal) and Chang Kin (head of the Kwangtung Military Hospital) have left for Hongkong. The three officials jointly issued a proclamation addressed to General Chan Chai-tong, in which they explained their strong desire to see a civil war within China avoided.

The newly appointed Garrison Commander of Canton City, General Chan Wai-chow (brother of General Chan Chai-tong) is a visitor now in Hongkong making a strong appeal to General Tsiang Kai-shek, former head of the Nineteenth Route Army, to join the southern cause. Chinese newspapers report that General Tsiang Kai-shek may come to Canton with General Chan Wai-chow.

To give Canton adequate protection in case of emergency, the Government has ordered the concentration of twenty gunboats in Canton harbour and at Whampoa.

Assuming responsibility for the disaffection of General Li Hsiang-shan (until recently garrison commander of Swatow), General Miao Pei-nan is also reported to have tendered his resignation. But the Government has asked him to remain at his post.

The public attention is still centred on the doings of Marshal Chiang Kai-shek at the second plenary session of the Kuomintang Central Executive Committee, which holds its first meeting this morning at the capital.

Well informed circles here say that there is very little chance that the five South-west demands will find endorsement at the conference. The demands ask for the severance of diplomatic relations with Japan, for one thing.

CANTON CRITICISED

Nanking, July 11.

A spokesman of the Finance Ministry issued a statement to-day in which he scathingly attacked the alleged action of General Chan Chai-tong in selling all the silver reserves in Kwangtung.

It is believed, he said, that Kwangtung is facing a hopeless monetary crisis.

It is expected that General Chan will retire.

Political and military authorities in Nanking advocate the reorganisation of Kwangtung's military and administrative systems. —United Press.

AMBUSHED BY ARAB RIFLEMEN

BUS PASSENGERS
SUFFER

TROOPS RUSH
TO SCENE

Jerusalem, July 10.
Arab terrorists ambushed an omnibus and its motor convoy between Jenin and Nablus and a Jewish passenger was killed and two more seriously wounded.

Two British soldiers were slightly wounded in the exchange of fire. Troops were later rushed to the spot where the ambush took place to meet a strong force of insurgents, four of whom have been killed and one captured, up to the present. Several others are reported to have been wounded. —Reuter.

BOMB THROWN

Jerusalem, July 10.

A bomb was thrown to-day in the precincts of the Police Headquarters of the city, but little damage was suffered.

Sniping continued during the night, a private of the British forces being slightly injured when fired on in a village which he was patrolling. —Reuter Bulletin Service.

NAZI MEETINGS BANNED

Berlin, July 10.

Dr. Josef Goebbels, Minister of Propaganda, has banned Nazi meetings throughout Germany during the Olympic games. —United Press.

JAPAN'S SEAMEN PATROL S'HAH

CRISIS COMES WITH MURDER OF CIVILIAN Black Gowned Killer Seen in Flight

BRITISH POLICE AID HONGKEW INQUIRY

Shanghai, July 11.

Hongkew, scene of the outbreak of hostilities in 1932, was once again transformed into a Japanese armed camp last night as a sequel to the murder of a Japanese business man, Mr. Kosaku Kayau. He was shot through the head by an unidentified assailant while carrying the year-old child of a friend and leading another baby by the hand. The children were not hurt.

A heavy force of Japanese bluejackets, steel-helmeted and with fixed bayonets, were rushed from the Naval Landing Party headquarters to the area where the shooting occurred. There they patrolled, afoot and on motorcycles and lorries.

Two of the bluejackets, riding a motor-cycle, came into collision with a motor car, driven by a Briton, Mr. C. N. Brooke, an official of the Chinese Customs, and were seriously injured.

In the course of the investigation of the shooting of Mr. Kayau, thirty or forty Chinese coolies who were sleeping on the pavement near the place of tragedy, have been rounded up for questioning.

Mr. Kayau was thirty-two years of age. He was rushed to hospital immediately after he was shot, and he died there at 1.05 a.m. to-day.

Police Collaborate

British police officers have gone to the scene of the crime and are co-operating with the Chinese police and the Japanese Consular and naval authorities in investigating the case.

The crime occurred in Chinese-administered territory, adjoining the international settlement.

A Japanese woman heard a muffled report and turned in time to see Mr. Kayau collapse in the street. But she saw no sign of any assailant.

The shooting has been followed by the usual Japanese warning to the Chinese authorities, who are urged to do their utmost to apprehend the culprit and also "to provide better protection for Japanese nationals in future."

Nanking Embarrassed

The Kayau incident has created a fresh source of Sino-Japanese friction.

NINE DIE BRAVELY IN U.S. PRISONS

Washington, July 10.
Nine men died bravely at the hands of executioners in various parts of the United States to-day.

At Salt Lake City Delbert Green clasped a crucifix, sitting in a chair, while five riflemen took aim. Three and a half minutes after leaving his cell, Green was dead, his heart riddled with bullets, and had paid the penalty for a triple slaying of six years ago.

At Huntsville, Tex. Grady Warren White, Mack Brown and his brother Oscar, negroes, were electrocuted for hold-up murders.

At Florence, Arizona, Frank Rawson, a Mexican Maquero, died in eight minutes in the lethal chamber, claiming his father committed the

murder for which he was executed. In Sing Sing John Collins, 27, was electrocuted for hold-up murder. He was hurried to his death, walking "the last mile" unassisted.

At Oklawaha, Missouri, Roosevelt Moon, a negro, was executed for killing a store-keeper. At Raleigh, N.C., Henry Grier, a negro, was electrocuted a few hours after he had broken his arm in a suicide attempt, when he leapt from the cell tower to the basement floor while saying farewell to other condemned men.

At San Quentin Irwin Otley, 35, an ex-soldier, was hanged for murdering his wife. —United Press.

SEMPHILL ABANDONS FLIGHT

WEAK WING FABRIC TO BLAME

CHALLENGE RECALLED

Vienna, July 10.

Lord Semphill has abandoned his attempt to set up a new record for the flight to Australia. It is understood that his decision was taken because of a defect in connection with the wings of his machine. He decided to return to London immediately.

It was found, apparently, that the fabric on the wings of his machine was cracked, making a long distance flight unsafe. The damage was being temporarily repaired and Lord Semphill is flying back to England to-night.

Lord Semphill is flying a streamlined monoplane and is accompanied by a relief pilot, Mr. H. Woods, a wireless operator and a ground engineer. They hoped to reach Australia in three and a half days and return in the same time.

Lord Semphill planned the voyage as a result of a challenge at a dinner in London when an Australian declared that British planes were not capable of beating American ones.

Austro Manpar is the fastest British commercial passenger machine and its route was by way of Vienna, Athens, Aleppo, Bushire, Karachi, Allahabad, Rangoon, Butavia, Sourabaya, Kaepong, Darwin, Gloucester, Charleville and Melbourne.

Lord Semphill arrived at Vienna at 9.03 p.m. —Reuter Special.

KLEIN CRACKS RECORD

FOUR HOME RUNS IN ONE GAME

CUBS WIN AGAIN

New York, July 10.

Chuck Klein smashed the National League home run record to-day when he hit four home runs in a ten inning game against Pittsburgh. He clinched the issue in the final frame by driving in three runs.

Philadelphia hit twelve times and the Pirates nine, to score six runs. Pirates had four of the six errors of the game.

Cincinnati fell before Boston's eleven hits, which gave the Braves four runs to their opponents' one. Gill hit a homer and Chicago scored six runs on eight hits to beat Brooklyn. The Dodgers hit six, and their two runs were the homers smacked by Hassett and Wilson. Dodgers had three errors.

AMERICAN LEAGUE

Newsom allowed Detroit only one hit when the Senators came to visit the Tigers, and the Washington crew scored five meanwhile.

Cleveland was also blanked by New York, and only got seven hits, while the Yankees hit twenty and scored eighteen, including homers by Dickey, DiMaggio and Gehrig, the latter hitting two. Indians had three of the five errors.

Chicago beat Boston eight to two. —Reuter.

HONOUR FOR MINISTER

SAW BAD DAYS IN ADDIS ABABA

London, July 10.

H. M. the King granted an audience at Buckingham Palace to Sir Sidney Barton, Minister at Addis Ababa, and conferred on him the insignia of Knight Grand Cross of the Order of the British Empire.

Sir Sidney is at present holidaying in England. He was in Addis Ababa throughout the trying days of the Italo-Ethiopian war. —Reuter Bulletin Service.

LORD TWEEDSMUIR IN HOSPITAL

Lord Tweedsmuir, Governor-General of Canada, who has been admitted to hospital in Montreal, owing to a return of his gastric trouble.

OLYMPIC HOPES ON TRIAL

BRITISH RUNNERS DISAPPOINT

COOPER WINS 2-MILE WALK

London, July 10.

The amateur athletic championships at the White City, constituting the Olympic trials, continued in the rain to-day. The track was heavy. Nevertheless, records were cracked.

In the two miles walk (final), the holder of the championship, Cooper of Great Britain, won by sixty yards in the time of 13 minutes 50 seconds. Bernard of Latvia and Charles of Australia were second and third.

Stohard, holder of the British half mile crown, and at the Olympic hope, failed to qualify for the final in this event. Lovelock and Wooderson qualified for the mile final.

In the final of the six mile race, Nofj of Poland led Burns and Potts of Great Britain home in 29 minutes 45.4 seconds, which was better than the native English record of 30 minutes 23.2 seconds. It was a cleverly judged race, Nofj, sprinting in the back stretch and winning by five yards. Eaton, the British Olympic hope, was out of form and was not placed.

In the hop-step-and-jump final, Metcalfe, of Australia, broke the English record of 46 feet 9 inches, travelling over 49 feet 6 inches of ground. Dickinson of Australia also topped the English record, doing 47 feet 11 inches, and Boyce, of Ireland, did 46 feet 1 inch. —Reuter.

ROOSEVELT GOING ON VACATION

TO CRUISE POTOMAC WITH SONS

Washington, July 10.

President Franklin D. Roosevelt is preparing for his vacation in Canada, and has cleared his desk of state matters.

He has studied the reports from Mr. William Green and other Labour leaders on the steel industry strike threat and union disputes generally, and has indicated that he will not interfere.

On Saturday the President will participate in the dedication of New York's new bridge. From there he will go to his home in Hyde Park for the week-end. On Monday he is proceeding to Rockland to join his three sons, who comprise the crew of the yacht Seawanna, and Mr. Roosevelt will cruise the Potomac with them, conveyed by a destroyer. —United Press.

GOVERNOR-GENERAL ILL

Montreal, July 10.

Lord Tweedsmuir, Governor-General of Canada, has gone to hospital for treatment for gastritis. —United Press.

OVER 370 DIE IN HEAT WAVE

Still No Relief For United States

WATER SHORTAGE IN N.Y.:

FOREST FIRE LOSS

New York, July 10.

The death toll in the United States heat wave still mounts. Over 370 have perished.

Nearly all the United States except northern New England continued to swelter in record-breaking heat to-day.

It is estimated that light rainfall may occur in the North-western states Sunday, but there is no sign of rain elsewhere.

As the thermometer reached 97 degrees this afternoon, Mayor La Guardia of New York City ordered all civic employees, except firemen and police, to leave their work for the remainder of the day in order to decrease the cases of prostration, which are most numerous amongst office workers.

A hundred thousand workers on public relief were also sent home after many had collapsed.

A serious water famine threatens New York State, and the State Health Department has ordered immediate curtailment of the use of water.

By mid-day to-day the death toll from the intense heat had passed the 300 mark. A total of 303 deaths was recorded.

Meanwhile forest fires have ruined thousands of acres of timber and crop and cattle losses are mounting to a fabulous total. —Reuter.

75,000 Jobs

Washington, July 10.
President Franklin D. Roosevelt announced at a press conference this afternoon that 75,000 jobs had been authorised in the drought area. Already 10,500 men were employed, he said.

Authorities assert that already more than 570,000 farms have been ravaged by the drought. —Reuter.

324 Now Dead

Chicago, July 10.
At least 324 are dead as a result of the heat wave.

There is no prospect of relief. Damage is estimated at \$50,000,000 (\$250,000,000 U.S.) and is mounting at the rate of \$200,000 for every hour the sun shines.

Hundreds of relief workers are fighting fires in Illinois and Michigan. Temperatures of over a hundred are common throughout two-thirds of the states. Thunderstorms have caused damage in isolated places, but have 000,000 farm dwellers have become destitute within the past five weeks. —United Press.

Increasing Toll

New York, July 10.
The death toll in the heat wave is now over 370.

One of the victims was Mr. Joe Humphreys, well-known Madison Square Garden prize fight announcer, who died of a heart attack brought on by the heat.

It is claimed that he introduced every heavyweight champion since John L. Sullivan. —Reuter.

ITALIANS PLEASED

FRANCE WITHDRAWS GUARANTEE

Rome, July 10.
The French withdrawal of the guarantee of assistance to Britain in the event of war has been received with great satisfaction here, as the step reached is considered more important than the reduction of British strength in the Mediterranean.

It is felt that the withdrawal of the guarantee by France means a desire for closer co-operation with Italy in European affairs. —Reuter's Bulletin Service.

END OF SANCTIONS

Paris, July 10.
A decree abandoning sanctions against Italy as from July 15 has been officially published. —Reuter.

STORMS LASHING ENGLAND

LIGHTNING HITS PLEASURE SHIP

EASTBOURNE FLOODED

London, July 10.

In contrast to the heat wave which is sweeping the United States, Britain is experiencing unusually cool and wet weather, which is upsetting holiday-makers and disastrously affecting cricket and other sporting events.

Eastbourne felt the brunt of an extensive storm this morning when thunder, resembling the firing of big guns, preceded a hailstorm of stones as big as marbles. The hail fell to a depth of two inches.

The fire brigade received over a hundred calls to pump out premises flooded by storm water, and the goods were floating around in the windows of many shops on the main street.

Lightning struck the last pleasure steamer out, the Brighton Belle, as she was approaching the pier. The ship was badly splintered. The master on the bridge and the purser, below decks, were knocked down and badly burned. —Reuter Special.

"Mayor Of Chinatown" Crushed

FAMOUS 'FRISCO CHARACTER

San Francisco, July 10.
Mr. Charlie Hing, 76, San Francisco's "Mayor of Chinatown," whose home was in Santa Rosa, was crushed to death under the wheels of a street car to-day.

Mr. Hing was a retired rancher and was reputedly fabulously wealthy. He was going to the pier to go aboard the President Hoover to return to China when he met his death. —United Press.

CONFIDENCE - VOTE

Paris, July 10.
A vote in the Chamber arising from an Opposition interpolation, alleging that the Government had furnished the Soviet with the plans of a secret aircraft gun, resulted in a motion of confidence in the Government being carried by 378 votes to 10.

The gun mentioned is reported to be able to fire eight hundred shots per minute, being invented by a Swiss working for a private firm.

Only six such guns are said to exist. —Reuter.

"My little boy is afraid of being alone at night."

Home Page Doctor Suggests a reason.

MY son, aged eleven, will not stay alone in his bedroom, but the presence of even his small sister comforts him. I have coaxed him to tell me what he is afraid of and he invariably replies, "The room is large and my one may get in."

The child is well developed, intelligent, and popular; he will stand up to boys bigger than himself, and will go anywhere outdoors in the dark.

He is one of a family, so is never alone except at bedtime, when the others have homework to finish.

ANXIOUS MOTHER

THE reasons for fear of the dark are various. The fact that your son is not fearful in other respects suggests that he is jealous of his younger sister, and that his fear is a subconscious trick for getting more attention from others, particularly from his mother.

Has his sister a room of her own?

It is no good arguing with him. If the cause is what I suggest, try to let him know (without actually saying so) that you make no distinction between your children.

If he does not improve, I should advise you to consult a doctor.

Did You Know?

That the Italian lira is a silver coin equal to 1/20th of English money. The name comes from the Latin word "lira," meaning weight. Quite naturally, of course, the value varies from time to time.

That although we half-jokingly call lumps of coal by the name "black diamonds," this is really a perfectly correct name, because, like real diamonds, coal is almost pure carbon.

That a diving bird called a loon can swim much faster when under water than it can on the surface. It is unable to walk properly because its legs are set too far back on its body, so it progresses in a series of bounds similar to the action of the kangaroo.

That the word "shilling" is Old English for "thin slice." Although this coin has been in use from Saxon times, it was not worth twelve pence until after the Norman Conquest. The present style dates from the time of Henry VII.

It's Never too late to GO INTO PRINT

three helpful suggestions
for making up new stuffs

LET'S look around and see what the newest designs are about.

Mostly animal or vegetable, it seems. Sentimentally distorted pigs,

ducks, elephants, almost

any animal—in bright

colours on discreet

grounds. Unlikely flowers breaking out

in rashes here and there, so that the

fabric looks as though it has been hand-

printed specially for you. Dark dots or

dashes on light fabrics for "useful little

frocks." Nightmarish big blooms on

stiff silks for evening...

LEFT: Two-piece in glazed linen, flower-spotted in blue on a stone ground. Note: clean, collarless fit of shoulder bands, fan of pleating at neck and from waist, three-quarter length sleeves—very full, then gripped in at elbow.

MIDDLE: "Square" jacket-cape, to go over light dresses or skirt and jumper. Heavily marked crepe. Frilled collar fits close round neck. Front of jacket is straight, not yoked as back. Pleated cape-sleeves.

RIGHT: Navy crepe with rust spots. Collar and waist swathing of white pique. Note: rather full bodice crosses over to waist; three-quarter length sleeves again; belt ties in same way as collar.

Some more Cold Sauces

THE two principal cold sauces in England are horse-radish sauce and mint sauce, but they are too well known to warrant description. There are, however, some excellent cold sauces not so well known, and here are a few.

Cumberland Sauce

Dissolve four tablespoonsful of red-currant jelly and add to them a good glass of port, a teaspoonful of finely chopped and blanched shallots, the same of orange rind cut in thin julienne strips and blanched, the same of lemon rind treated in the same way, a teaspoonful of mustard, a little cayenne pepper and powdered ginger, the juice of an orange and of half a lemon. Mix all well together and it is ready.

Ravigote Sauce

There is a hot Ravigote Sauce, too. This cold one is sometimes known by the name of Vinaigrette. It is particularly good with boiled calf's head, sheep's trotters, etc. Mix thoroughly together in a bowl half a pint of olive oil, a sixth of a pint of vinegar, a touch of salt and pepper and a tablespoonful and a half

Carrot Croquettes

PEEL, wash and cut up the carrots—boil in salted water until soft (keeping a few whole for decoration). Drain, mash and press out all the water in a clean cloth. Season as needed, adding a little cayenne pepper and mix with the yolk of an egg—or two, as needed. When cold, shape into circular croquettes, slightly flattened to receive decoration on top, dip in egg and breadcrumbs and fry to a golden brown.

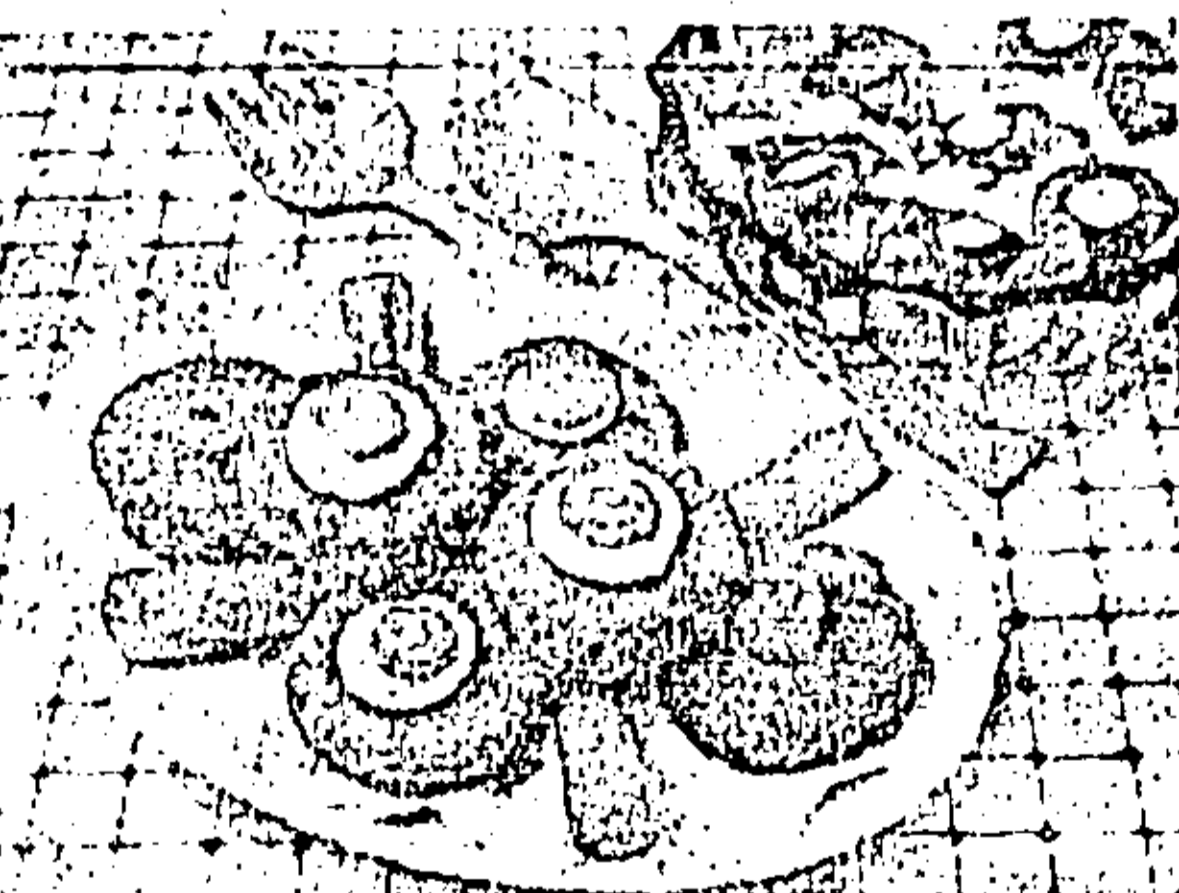

Serve with a fresh salad and cucumber sauce made in the second way described below.

Cucumber Sauce

This is an American sauce and is made in two ways. (1) Pare two cucumbers, grate them and drain them well, then season to taste with salt, pepper and vinegar.

(2) Beat thickly but not stiffly a gill of double cream, and add to it gradually, while beating well, two tablespoonsful of vinegar. Season with salt and pepper, and stir in a peeled, chopped and well-drained cucumber.

A sauce from Scandinavia, to be remembered when eating asparagus. Cream 6oz. of fresh butter with a wooden spoon over a basin of hot water and when it is creamy and white, add carefully about half a teaspoonful of lemon juice.

MACHINE TO GIVE 'LUNGS' TO AIRMEN

May Help Britain To Conquer The Stratosphere

SECRET PLANS BY THE R.A.F.

Mechanical "blowers" to supply air to the pilots are contemplated for later R.A.F. stratosphere flights. The old method of signalling by arm from highspeed R.A.F. fighters may be modified.

MECHANICAL blowers, like the superchargers of racing engines, may be used to supply air in life-giving quantities to the pilots of British aeroplanes which will explore the stratosphere, that mysterious upper region which begins at more than six miles above sea level.

The blowers, driven from the engine, will force air into a sealed cabin, replacing the usual oxygen cylinders.

The control rods will be led through glands to the engine and control surfaces, to prevent leakage of the precious air into the thin air outside.

This aeroplane has begun its flying trials, using an ordinary engine.

The special stratosphere engine, a Bristol Pegasus, will be ready in little more than two months.

The Royal Air Force has already provisionally selected a pilot to carry out experimental tests from Farnborough, but the Air Ministry hopes to keep his name secret till the experiments have begun.

When the altitude record was won for Britain by Flight Lieut. Uwins,

CAN YOU SAY IT?

THIS is what a motorist, accused of driving under the influence of drink, was asked to say at Woking:

"Biblical criticisms."
"She sails sea shells on the sea shore."

"The shells she sails were sea shore shells, I'm sure."

The motorist, Mr. James Garalde, of London - road, Ripley, failed in the first test, but repeated the two others correctly, said a doctor at the police court recently.

Garalde was fined £10 and his licence was suspended for a year.

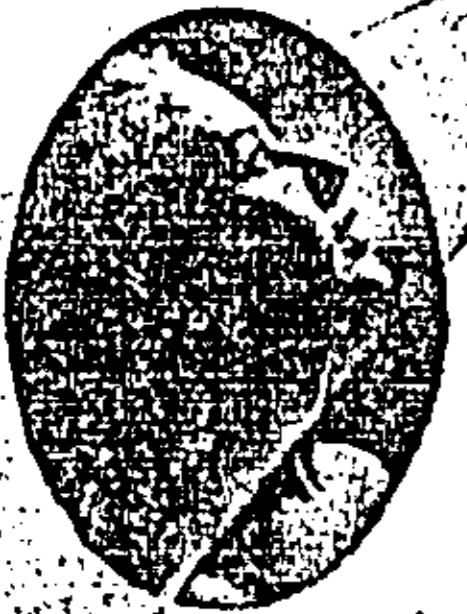

GERMANS BARRED

"Any beneficiary under this will marrying a person of German nationality shall forfeit all benefit hereunder," wrote Miss Georgiana Florence Adams, of Ethelbert-road, Bromley, Kent, in her will. She left her property, valued at £8,768 among members of her family.

Record Breaker

Peter Duns, 29, established a new record for 125-horse-power motors during a recent try-out at Agua Caliente.

TRANS-ATLANTIC AVIATION

New Midsea Aerodrome For Germany

Berlin, July 1.
Germany's third floating aerodrome, the Ostmark, recently built at the Howalls Works, Kiel, for the Luftwaffe, sailed from German waters a few days ago, and is expected to take up her position off Bathurst, British Gambia, early next week.

Whereas the Westfalen and the Schwabenland, the two other vessels now in use in connection with the South American air-mail service are ordinary steamers reconstructed to enable aeroplanes to be catapulted from their decks, the Ostmark has been specially built as a "floating aerodrome."

As Alberto, two vessels—one stationed off the African coast, the other off the coast of Brazil—will serve as "steering islands" and the purpose of putting the third ship into service is to enable them to be released in turn from time to time for overhauling.

"PRESTIGE OF THE REICH"

The Ostmark, it is explained, has been so named because like East Prussia, frontier district "it will work for the prestige of the Reich at an advanced post and give expression at the same time to the very close association existing between the most modern method of transport and the East of Germany."

With a displacement of 2,000 tons a length of about 350 feet and a beam of about 40 feet, the Ostmark is substantially smaller than the Westfalen of the Schwabenland. Her two diesel engines each develop 950 h.p. and she can reach a speed of about fourteen knots.

Like the Westfalen and Schwabenland, the Ostmark is equipped with a catapult arrangement, by means of which a 19-ton Dornier flying-boat—the type used on the South American air-mail service—can be projected into the air at a speed of some ninety miles an hour but technically she is a great improvement on her sister ship.

Unlike in the case of the Schwabenland, the flying-boat will be projected from the deck of the Ostmark over the bows.

The arrangement of the rails from which the flying-boat is actually catapulted is noteworthy in that they take up the middle of the deck lengthwise.

The rear part of the projector-rails connects, with a turn-able, thus enabling a second flying-boat to be taken on board.

If required, both flying-boats can be shot off in succession.

An electrically-driven crane of a special construction is used to hoist the flying-boat on the "floating aerodrome" over the stern. The post of the crane can be laid flat on the rails, and the coming bridge is divided on this account.

The upright member of the crane is shaped like a mast in order to serve as an aerial and likewise provide a stand for the searchlight.

LANDING APRON

To facilitate the lifting on board of a flying-boat at sea the Ostmark is equipped with a landing apron. As the motor-boat comes down, this landing apron is flooded in such a fashion as to cause the motorship—the "floating aerodrome"—to reduce speed and after the landing has been effected in the apron the vessel puts on speed.

This increase of speed of the boat then causes the landing apron to stiffen, and the flying-boat becomes raised somewhat out of the water by this procedure the motorship and flying-boat are connected more firmly

together, thereby enabling the aeroplane to be taken on board without aid even in a choppy sea.

To meet the great requirements of safety in the air service over the South Atlantic the "floating aerodrome" has a wireless station of the most up-to-date kind and fitted out with a direction-finder aerial, and an emergency transmitter.

Because (as already mentioned) the projector-rails stretch down almost the whole length of the vessel a special arrangement for fixing the aerial has been provided.

Thus a mast has been set up on each side of the projector-track, and from these masts the antennae are carried over to the rear crane-mast, the catapulting of a flying-boat these masts can be clapped down on board so that they no longer are an obstacle in the way of the flying-boat when it starts.

In view of the constant employment of the board in the tropics, the needs of the crew are specially catered for. Their accommodation is roomy and equipped in the most modern fashion. There is a wireless set with loud-speaker, a cinema, a good library, and various games.

Since the Luftwaffe started their regular air service from Germany over the Atlantic to South America on February 3, 1934, about 180 scheduled aerial flights have been carried out without mishap.

BOMBED BY BIRD

Calcutta, July 1.
Mr. Debesh Chandra Sen, is seriously ill in hospital at Tanque, Bengal, suffering from injuries caused by a stone dropped on his head by a vulture when he was out walking.—*Reuter*.

AMERICA BUILDS A NEW TORPEDO BOAT

Stamford, Conn., July 1.

A 50-foot silver and red "crash" boat, which in the next war may launch torpedoes against enemy battleships and outrace any other fighting craft on the seas, swept over the Stamford Harbour recently in final tests preparatory to a speed run to Norfolk, Va.

The trim, powerful craft, which develops 1,200 horse-power with its four sterling Dolphin engines, may become Uncle Sam's newest fighting arm with its top speed of 50 miles an hour and amazing manoeuvrability. Designed for peace time rescue work, the "crash" boat reportedly can be turned into a small arsenal capable of slipping up on battleships in the dark and destroying them without losing any of its four-man crew.

Its outstanding characteristic is the grooved bottom which enables it to skim the waves and carry the spray under the hull at the stern end.

With a crew of four the boat will carry a two-ton torpedo on each side. No artillery, machine guns or armour plate will weight it down. With an effective range of 800 miles the crash boats may be carried on battleships and released in swarms—like an air squadron to torpedo an enemy fleet. After releasing its torpedoes, the boat

Photographers Can Crash Into Hollywood this Way

ASPIRING screen stars and technicians are trying a new trick to crash the gates of Hollywood. It became known when John Arnold, head of the Metro-Goldwyn-Mayer camera department, revealed that he has received 125 reels of small-sized motion picture film from amateurs.

These owners of eight and sixteen-millimeter camera and projection equipment are teaching some of Hollywood's professional tricks of their own trade, says Arnold.

"Amateurs," he says, "are not afraid to experiment, while the professionals are, and from amateur experiments have come some of the most enlightening principles in cinematography. New ways of handling the lens pointed against sunlight, new principles of composition, new methods of obtaining pictorial texture, have all come to us from amateurs."

Arnold's organisation some time ago held a competition for amateurs at which several films were voted, as artistic achievements, as good, or better than, average professional work.

"Carelessness and haste," says Arnold, "are the besetting faults of many beginners. They get in too much of a hurry to change film, don't go to a dark place, and thus waste much footage."

"They get excited, move the camera too fast, and get a flutter. Too often the amateur doesn't use a tripod. I believe one should always be used, for no human hand can hold a camera perfectly steady."

The amateur, also, says Arnold, becomes careless about setting the interior of his camera to distance-free, and sometimes fails to clean his lens.

"If there is a coat on the lens, or on a film," he says, "the amateur should take it to his dealer and never try photographic solutions himself."

The camera expert, who supervised photography of such films as *Roméo and Juliet*, *The Great Ziegfeld*, and *Juliet*, gives a few more hints for amateurs and beginners.

"If you cannot afford lamps for interior photography, just buy photographic flood bulbs and make reflectors from aluminium wash basins," he suggests.

Vatican Discovery of Lost Theatre

Rome, July 1.
The theatre of Pope Julius III, of which all traces had been lost, has been discovered by accident.

It was brought to light when, in the apartment of the Papal Guard, a fresco by the painter Taddeo Zuccaro (1529-1566) was revealed.

The present Pope intends to have the theatre rebuilt for the presentation of modern plays.

Accommodation for 800 spectators will be provided in the body of the theatre and for another 200 in boxes.—*Central News*.

"with wooden stands easily made of scrap lumber. Always backlight the subject, filling the background with light so it won't photograph as black, and use a light from behind for the halo effect on a woman's hair. Composition principles can be learned from public library books. Card-board reflectors, two feet square, aluminium painted, can be used to soften hard shadows in sunlight, by reflecting light under hat brims or wherever necessary."

The principal advice he gives the amateur is to "think out in advance what you're going to photograph," thus saving footage. "Always tell one thing at a time," he suggests.

"For instance, if the subject is a girl riding around a hill, try first, a long shot showing the hill, rider and all," he says. "Then, move the camera forward to show just horse and rider and disclose that the rider is a girl. A 'close-up' will reveal her identity. This is the basic principle of every script, from *Roméo and Juliet* to the shortest short."

Woman Has No Food For 56 Years

LIVES ON SALT AND WATER

Calcutta, July 1.

It is claimed that for fifty-six years not a morsel of food has passed the lips of Giribala Devi, a woman who is still handsome and vigorous at the age of sixty-eight.

Giribala lives in the village of Bankura, where she was born. It was there that she told her remarkable story.

THE SECRET

"I was married at twelve years of age," she said. "My husband died within a few months. I began to suffer acutely from melancholia. 'Medical men could do nothing for me, and my life was despaired of. Then as a last resource my family called in the assistance of a wandering Yogi."

"There was an immediate improvement in my condition. I began to study Yoga philosophy, and learned the secret of how to dispense with food."

"My sole diet since then has been plenty of water in which a pinch of salt has been dissolved and I get plenty of fresh air and sunshine."

"I have never had a day's illness, never been hungry or tired, although I work hard. One hour a day I set aside for silent contemplation."

SWALLOWED A NAIL

8,000 Miles To

Get It Out

Balboa (Panama), July 1.
THREE - YEAR - OLD Kelvin Rogers, swallowed a nail eighteen months ago.

To-day he and his mother arrived at Balboa from Melbourne on their way to Philadelphia.

They have had to travel 8,000 miles so that Kelvin can be operated on by Dr. Chevalier Jackson, of Philadelphia, the inventor of the bronchoscope, the only surgical instrument able to remove the nail.

Kelvin, who enjoys being at sea, is a pink-cheeked youngster who looks none the worse for the presence of the nail.

"The use of the bronchoscope in King's College Hospital, London, to remove a safety-pin from a boy's lung was mentioned at an inquest at Camberwell recently."

NEW ZEALAND WAR DEATHS

ONE MAN IN FOUR

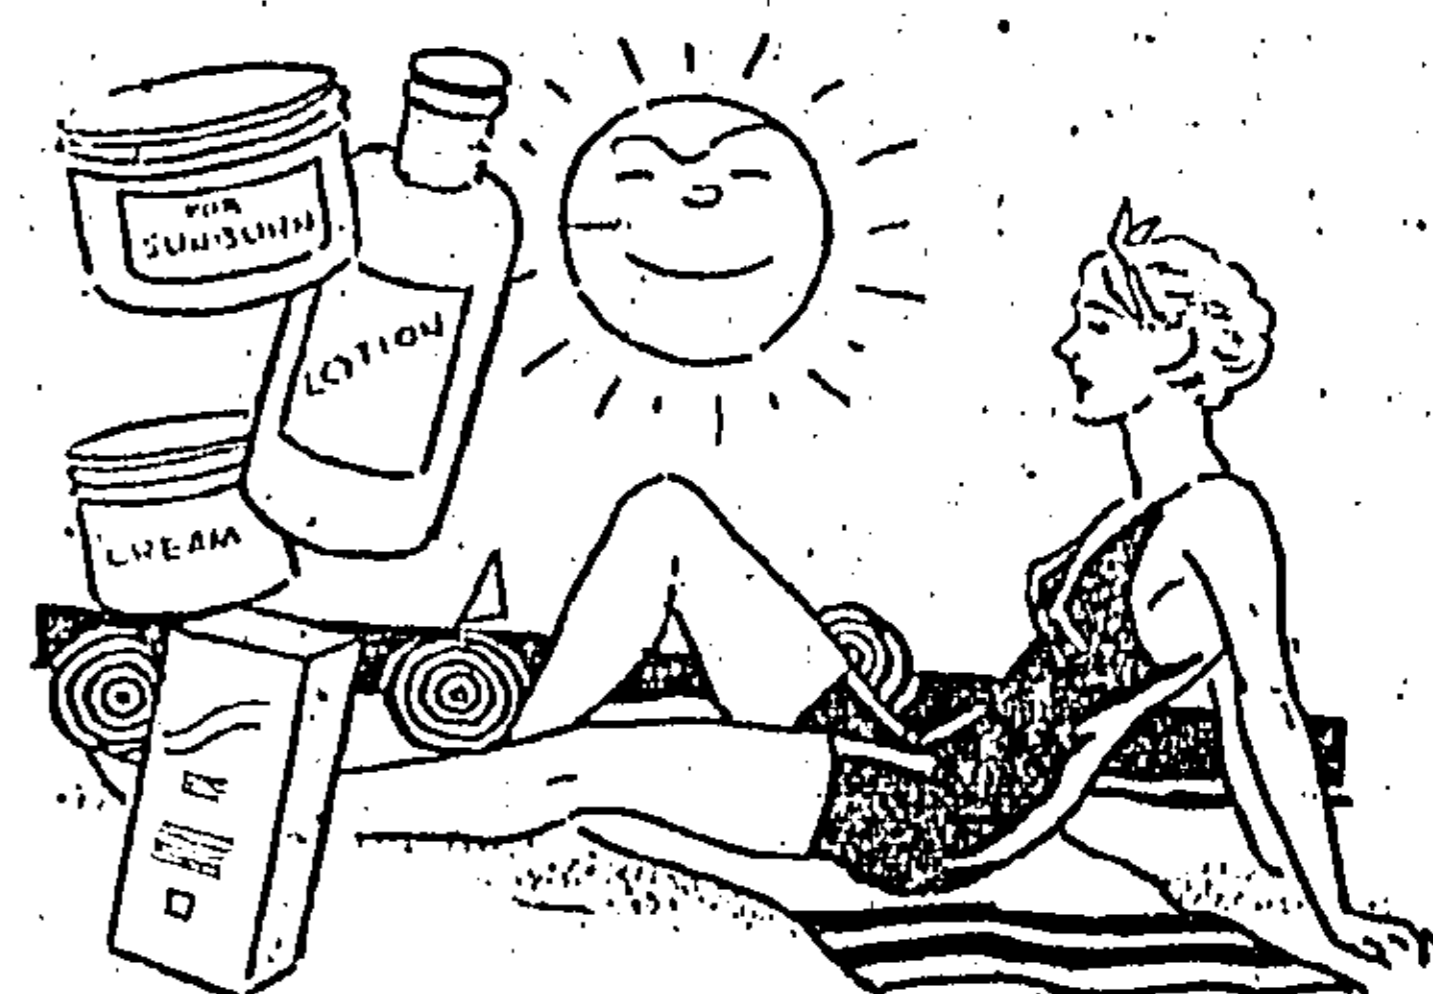

Wellington, N.Z., July 1.
Latest official figures compiled regarding war graves show that 7,883 men who served in the N.Z.E.F. during the Great War have died since the Armistice was signed.

Although all these deaths cannot be traced to the war, a very large number were due to war disabilities, and when they are added to the losses in the field they make a total of 24,379 deaths in the ranks of those who served—approximately one in every four.

Gift From Ex-Kaiser

Mr. A. T. Barber, who as Major of Windsor in 1899 welcomed the ex-Kaiser when he arrived on a State visit to Queen Victoria, has received from Holland a signed photograph of the ex-Kaiser.

The photograph bears the message: "In remembrance of my happy visit to Windsor and with my best regards."

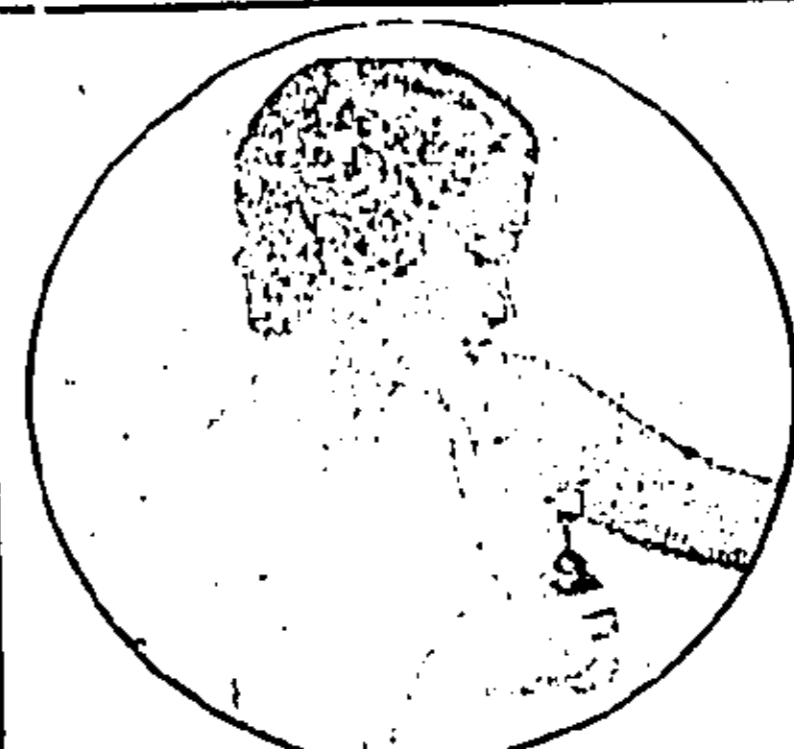

TAN IS GRAND, BUT SUNBURN'S A BRAND

It's good to have a tan—but how different a feeling is sunburn! You should be prepared with the right lotion. Come in before you go along to the beach. Our line of lotions and creams is complete.

The GRAND DISPENSARY

— Limited — CHINA BUILDING. PHONE 20606.

Do YOU Wonder If it is YOU?

When the unmistakable odour of perspiration suddenly assails you, are you alarmed that it might be this fear—safely stops under-arm perspiration. It does more than protect your person, it saves your clothes from perspiration damage. A doctor's discovery. Odo-ro-no is safe to use.

ODO-RO-NO

Now!... Restore Natural Whiteness to Your Teeth!

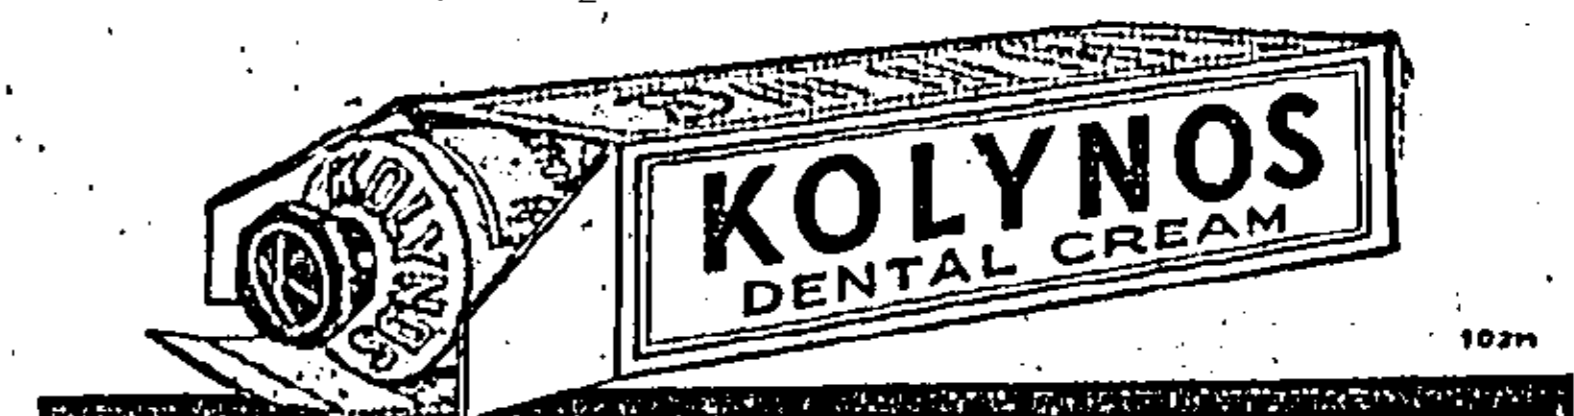

An Antiseptic Cleansing Dental Cream That's Bringing New Attractiveness to Millions!

There is now a way to restore the natural whiteness and brilliance to your teeth. It is called the Kolynos method.

All you do is put just a half-inch of Kolynos on a dry brush. Quickly the antiseptic Kolynos foam reaches every tiny crevice and fissure. Millions of germs that cause stain, discoloration and decay are destroyed and washed away. Soon your teeth lose their dullness. Natural whiteness and brilliance are restored—your mouth feels clean and refreshed.

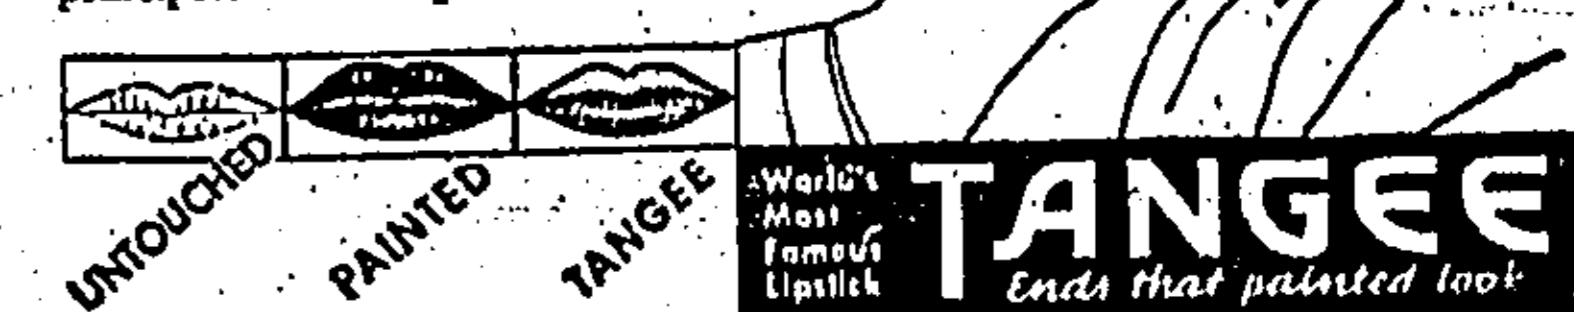

Try Kolynos. Use it morning and night and you will be delighted and amazed at what it does.

Economize—buy the large tube.

TO TINT IS NOT TO PAINT

Truly smart women know that make-up should brighten—not paint! Tangee, isn't paint. Tangee changes color as you apply it and blends magically with your own natural, individual coloring. Its cream base keeps lips soft, smooth, youthful. Also try Tangee Face Powder, contains the magic color principle. Ends that powdered look.

The S.A.C.A. Meeting will be held in the Church Hall on Tuesday evening, at 7.30 p.m.

The Helens May Christian Fellowship meets at 10.30 a.m. in the Institute on Friday morning.

CHRISTIAN SCIENCE LESSON SERMON

First Church of Christ, Scientist, Hongkong

SUNDAY'S SERVICE

The subject of the Lesson Sermon in all churches of Christ, Scientist, to-morrow, July 12, will be: "Sacrament."

The Golden Text will be: "To do good and to communicate forget not: for with such sacrifices God is well pleased." (Heb. 13.16).

Among others the following citations from the Bible will be read: "And a certain man came from his mother's womb was carried, whom they laid daily at the gate of the temple which is called Beautiful, to ask alms of them that entered into the temple; and entered with them into the temple, walking, and leaping, and praising God."

PARTICULARS & CONDITIONS of the Sale by Public Auction to be held on Monday, the 13th day of July, 1936, at 3 p.m., at the Office of the Public Works Department, by Order of His Excellency the Governor of one Lot of Crown Land at Island Road in the Colony of Hong Kong, for a term of 75 years, with the option of renewal at a Crown Rent to be fixed by the Surveyor of His Majesty the King, for one further term of 75 years.

Intending bidders are advised that immediately after the disposal of the lot the purchaser will be required to deposit with an authorised officer who will be present at the sale, the sum of two hundred dollars, \$200.00 in cash. This sum will be refunded on payment of the purchase price.

PARTICULARS OF THE LOT.

No. of Sale	Registry No.	Locality	Boundary Measurements	Contents in sq. feet	Annual Rental	Upset Price
1	385	Rural Building Lot No. 385, South East of Rural Building Lot No. 383, Island Road.	N. 100' E. 100' S. 100' W. 100'	13,000	\$150	\$2,800
			As per sale plan.	About 13,000	\$150	\$2,800

The Lesson Sermon will also include the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy:

First in the list of Christian duties, he taught his followers the duty of truth and love. He attached no importance to dead ceremonies. It is the living Christ, the practical Truth, which makes Jesus "the resurrection and the life" to all who follow him in deed. Obeying his precious precepts, following his demonstration so far as we apprehend it—we drink of his cup, partake of his bread, are baptized with his purity; and at last we shall rest, sit down with him, in a full understanding of the divine Principle which triumphs over death.

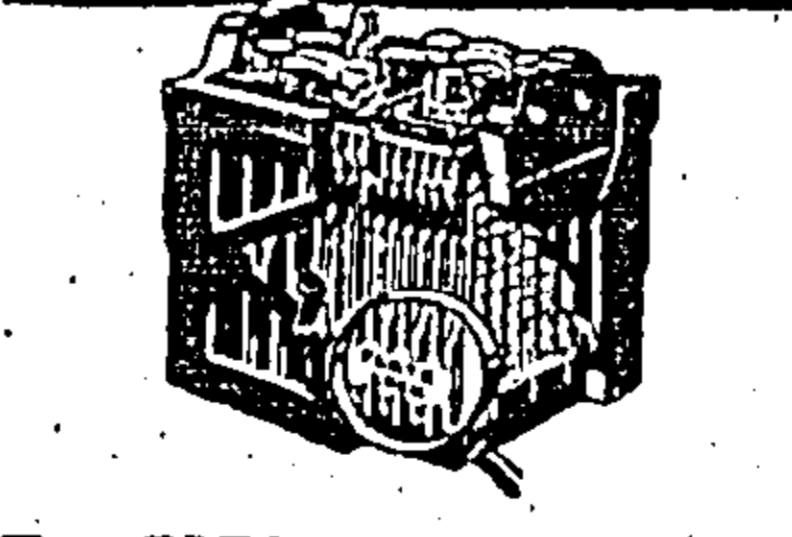

May the Christians of to-day take up the more practical import of that career. It is possible, yea, it is the duty and privilege of every child, man and woman—to follow in some degree the example of the Master by the demonstration of Truth and Life, of health and holiness. Christians claim to be his followers, but do they follow him in the way that he commanded? Hear these imperative commands: "Be ye therefore perfect, even as your Father which is in heaven is perfect." "God ye into all the world, and preach the gospel to every creature." "HEAL THE SICK". (Pages 31 and 37).

Announcements

(Branches of the Mother Church The First Church of Christ, Scientist in Boston, Mass.)
Macdonnell Road, below Bowen Road Tram station.

All authorised Christian Science Literature is available at the Reading Room.
The Public is cordially invited to attend the Service and visit the Reading Room.

ONE BIG REASON

For VESTA'S Long Life

The PLATE-LOCK—Sturdy strips of shank, that do a very big job. They keep the plates apart, preventing buckling and short circuiting. Thus the cause of 75% of battery breakdowns is practically eliminated.

OTHER BIG REASONS:

Carefully tested materials, and the KNOWING HOW to make a good storage battery.

Lower in price and guaranteed unconditionally.

VESTA BATTERIES

Obtainable from Harry Wicking & Co. Ltd. Prince's Building, Sole Agents for The Vesta Battery Co. (Australia) Ltd. who stock types for any make of Car or Truck.

Nina Mac Kinney, as Lilong, wife of Bosambo, in "Sanders of the River," British film featuring Leslie Banks and Paul Robeson, showing at the King's Theatre to-day.

NEW YORK STOCK EXCHANGE

MARKET UPWARD YESTERDAY

New York, July 10.
Swan, Culbertson & Fritz. Dow Jones summary of yesterday's market.—The market to-day witnessed the most active session since April 30 and prices rose as much as 4 points, while Dow-Jones' composite average for seventy stocks reached a high level since 1931. The increasing demand for steel and motor securities influenced the entire list, while the strong tendency of the commodity markets was also a factor. The market closed at around the day's highs, with traders bidding briskly. The market for bonds was strong, led by railroad and industrial issues. Stocks on the Curb Exchange were higher, led by utility issues.

S. C. & F. New York office cables:—Stocks: Securities continued to be in strong demand and leaders were bullish. We expect prices to continue their advance. Bank Clearing during the past week rose by 40.5 per cent.

Cotton: The market continued active on the advance in textile prices and the tightness of "spots." There is some fear that the drought will extend to the South-West Cotton belt. Contracts are scarce and the market looks higher. Forwardings to mills during the past week totalled 156,000 bales as against 199,000 bales the previous week.

Wheat: The crops both here and in Canada continue to deteriorate owing to the lack of moisture and no relief is forecast. Heavy heading operations to-day were easily absorbed. The Canadian Government's estimate indicates a Spring wheat crop of 126,000,000 bushels, a Winter yield of 512,000,000 bushels and a corn crop of 2,244,000,000 bushels on the basis of the condition as of July 1st. It is claimed that the crops have suffered severely since the Government figures were compiled.

Corn: There is increasing uncertainty owing to the lack of drought relief and none is forecast.

Rubber: The market advanced on expectation of high June consumption and a decrease in the English stocks of rubber. Interest to-day was broader.

Hides: The Government announced that any drought slaughtering which are found to be necessary will be handled so as not to disturb the market.

S. C. & F. Wall Street Journal morning comment:—"The market's technical position has been strengthened following the recent weakness in special groups. There was a fair volume of order from Europe yesterday, including purchases of Electric Bond & Share issues. Brokers continue bullish on Coca Cola stocks. It is rumoured that some railroad companies will increase their dividends."

REUTER QUOTATIONS

Dow Jones Averages:	July 9	July 10
30 Industrials	157.71	160.07
20 Rails	49.18	49.86

FINE SERVICE REWARDED

ADMIRAL SIR JOHN KELLY

London, July 10. Admiral Sir John Kelly has been selected for special promotion as Admiral of the Fleet, in recognition of distinguished services.

Consequently, Vice-Admiral Sir Edward Evans has been promoted Admiral and re-appointed Commander-in-Chief of the Home Station. A British Wireless message states that in consequence of Admiral Kelly's special promotion the following promotions are announced:—Vice-Admiral Sir Edward Evans to be Admiral and Rear-Admiral Noel Laurence, Vice-Admiral, while the following officers receive the promotions mentioned and are placed on the retired list:—Captain Harold Franklin to be Rear-Admiral; Captain Malcolm Maxwell to be Rear-Admiral; Captain Patrick MacNamara, Rear-Admiral; Captain Leonard Potter, Rear-Admiral; Captain John Young, Rear-Admiral; Captain Montague Legge, Rear-Admiral; Captain John Legge, Rear-Admiral; Captain Commodore (second class) Edmund Drummond is promoted Rear-Admiral. He will be borne supernumerary to the list of flag officers while holding his present appointment under the New Zealand Government. Captain Commodore (second class) Cyril Sedgwick is promoted Rear-Admiral and is placed on the retired list, and, in consequence, William Whitworth is promoted Rear-Admiral. Vice-Admiral Laurence is reappointed Vice-Admiral aircraft carriers on promotion.

2 p.m. The New Light Symphony Orchestra.

Solemn Melody (Walford Davies); Cavatina (Raff); Zampa—Overture (Herold); Post and Peasant—Overture (Suppe); Romance (Tschai-kovsky).

2.30 p.m. Close Down.

4.7 p.m. Chinese Programme.

7 p.m. "Symphony No. 3 in E flat"

FARMER'S WIFE WHO COULD NOT MILK

Finger Stiff With Arthritis.

What a handicap a disabled hand can be to a farmer's wife. Read what this one says about her troubles when she had arthritis:—

"I was suffering from arthritis in the joints of my fingers. My middle finger was so terribly swollen and inflamed that I could not bend it. As I help to milk 10 or 11 cows, this was a serious handicap. I bought a bottle of Kruschen Salts on the advice of my doctor, and took a half-teaspoonful in warm water every morning before breakfast. In two weeks the finger was less stiff and the swelling down. I continued the treatment (rubbing on an ointment as well), and after a month was able to milk again. I also feel very much better in myself."—(Mrs.) A. C. P.

It is the needle-pointed crystals of uric acid, lodging between the joints, which are responsible for the agony of rheumatism. Kruschen Salts dissolve these torturing crystals and promptly expel them from the system. That is why Kruschen brings such quick and comforting relief from the pains of rheumatism and other uric acid complaints.

Major" (Beethoven) played by Symphony Orchestra conducted by Albert Coates.

7.45 p.m. A Recital by Essie Ackland (Contralto).

1. He shall feed his flock ("The Messiah") (Handel); 2. Che Faro Senza Euridice (Gluck); 3. Gentle Zephyrs (Jensen); 4. The Fairy Tales of Ireland (Eric Coates).

8 p.m. Time, Weather and Announcements.

8.03 p.m. Excerpts from Grand Opera.

Vocal Gems—Aida (Verdi); Faustina—The Bartered Bride (Smetana); Vocal Gems—Carmen (Bizet).

8.30 p.m. Orchestre Raymonde.

Berceuse (Jarnoff); Gourd in Vienna (arr. Walter); Glow Worm—Intermezzo (Lincke); Indian Mail—Descriptive (Lamoth).

8.45 p.m. Four Songs by Stuart Robertson (Bass-Baritone).

1. The Roadside Fire (Williams); 2. Bright is the Ring of Words (Williams); 3. In summertime on Bristol (Peel); 4. Sea Fever (Ireland).

9 p.m. Reuter Press Bulletins.

9.05 p.m. From the Studio.

The Band of the 1st. Bataillon Royal Ulster Rifles, (by kind permission of Colonel R. M. Rodwell and Officer's). Conductor—H. Alfred Hole, A.R.C. M.—Bandmaster.

Programme.

MAKE-UP HINTS

By
MAX FACTOR

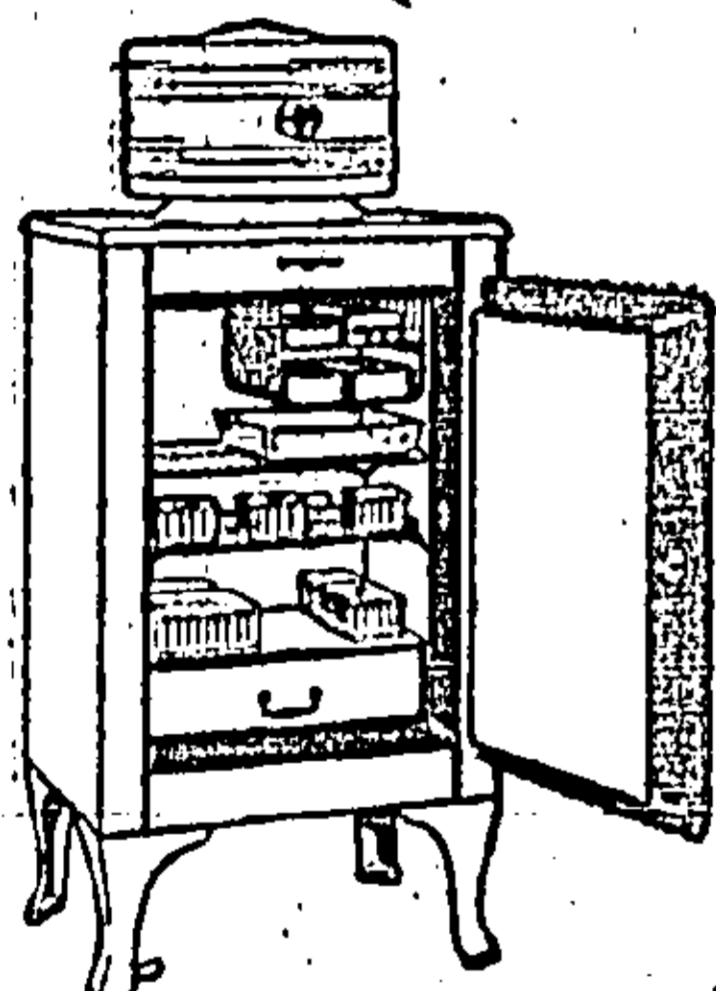

AIRLINE HOSTESSES MUST BE BEAUTIFUL—Officials of United States' United Airlines decided their plane hostesses should look as pretty at the end of the flight as at the beginning. Hence they called upon Max Factor, Hollywood's famous cosmetician, to create a make-up for the 155 stewardesses who fly the line that will outlast the daily five hour flight normally required of each stewardess. Photo shows (top to bottom) Alice Johnson, Cecilia Gilligan, Rheinholda Dubbertuhl, Helen Hawkins and Marcelline Garvis being made up by Max Factor.

The Airlines are following 96% of all screen Stars in the exclusive use of Max Factor's make-up.

The Pope Prepares for His Annual Holiday in the Hills

PALACE THAT IS LITTLE VATICAN

Vatican City, July 1.
POPE PIUS XI is preparing for his annual summer stay at Castelgandolfo, the "Little Vatican" in the hills above Rome.

He will leave his apartments in the Vatican on July 10, staying at his summer palace probably for about two months.

Public and private audiences, the business of the Papal Court and receptions of Ambassadors to the Holy See will be removed from Rome to the Pontifical villa.

For the Pope himself will begin another of the seasons which he counts among the happiest of his life—days spent in great part in the open air, relaxation of the heavy ceremonial of the Vatican and contact with the Italian countryside from which he sprang as young Achille Ratti of the village of Desio.

Much of the villa and the 120 acres of park and farm land that surround it were laid out under the Pope's own eye.

Here he has a dairy farm, which he inspects almost daily during the summer and from which milk is sent to him in the year round. Ten miles of roads winding through the estate give space for motor rides. There are vineyards and orchards.

STILL WORKS HARD
Though, technically, the Pope's residence at Castelgandolfo is meant to be a holiday from the severe routine of the Vatican, it is learned authoritatively that he has strenuous duties to discharge.

He is up before 7 a.m. and is often working until late at night.

Sometimes he breaks his work with a stroll on the large terrace which looks down on Lake Albano, the Roman Campagna and the distant Mediterranean.

Though the first plans for the palace at Castelgandolfo go back to 1680, virtually the whole estate was rebuilt for Pius XI.

Abandoned from 1870 to 1929, when the Lateran treaty with Mussolini released the Pope from seclusion in the Vatican, the building was in dangerous condition when Pope Pius decided to reoccupy it.

ENGINEER NEPHEW
More than two years' work was required to rebuild the old structure, reclaim the gardens and install modern conveniences—lifts, electric light and an irrigation and water system.

The Vatican observatory was moved to Castelgandolfo—some 200 tons of apparatus included—to escape the bright lights of the capital, which made observations difficult.

Much of the reconstruction was done under the supervision of Pope Pius's nephew, Franco Ratti, who is an engineer.

M.P. WHO WALKED 200 MILES ON HONEYMOON

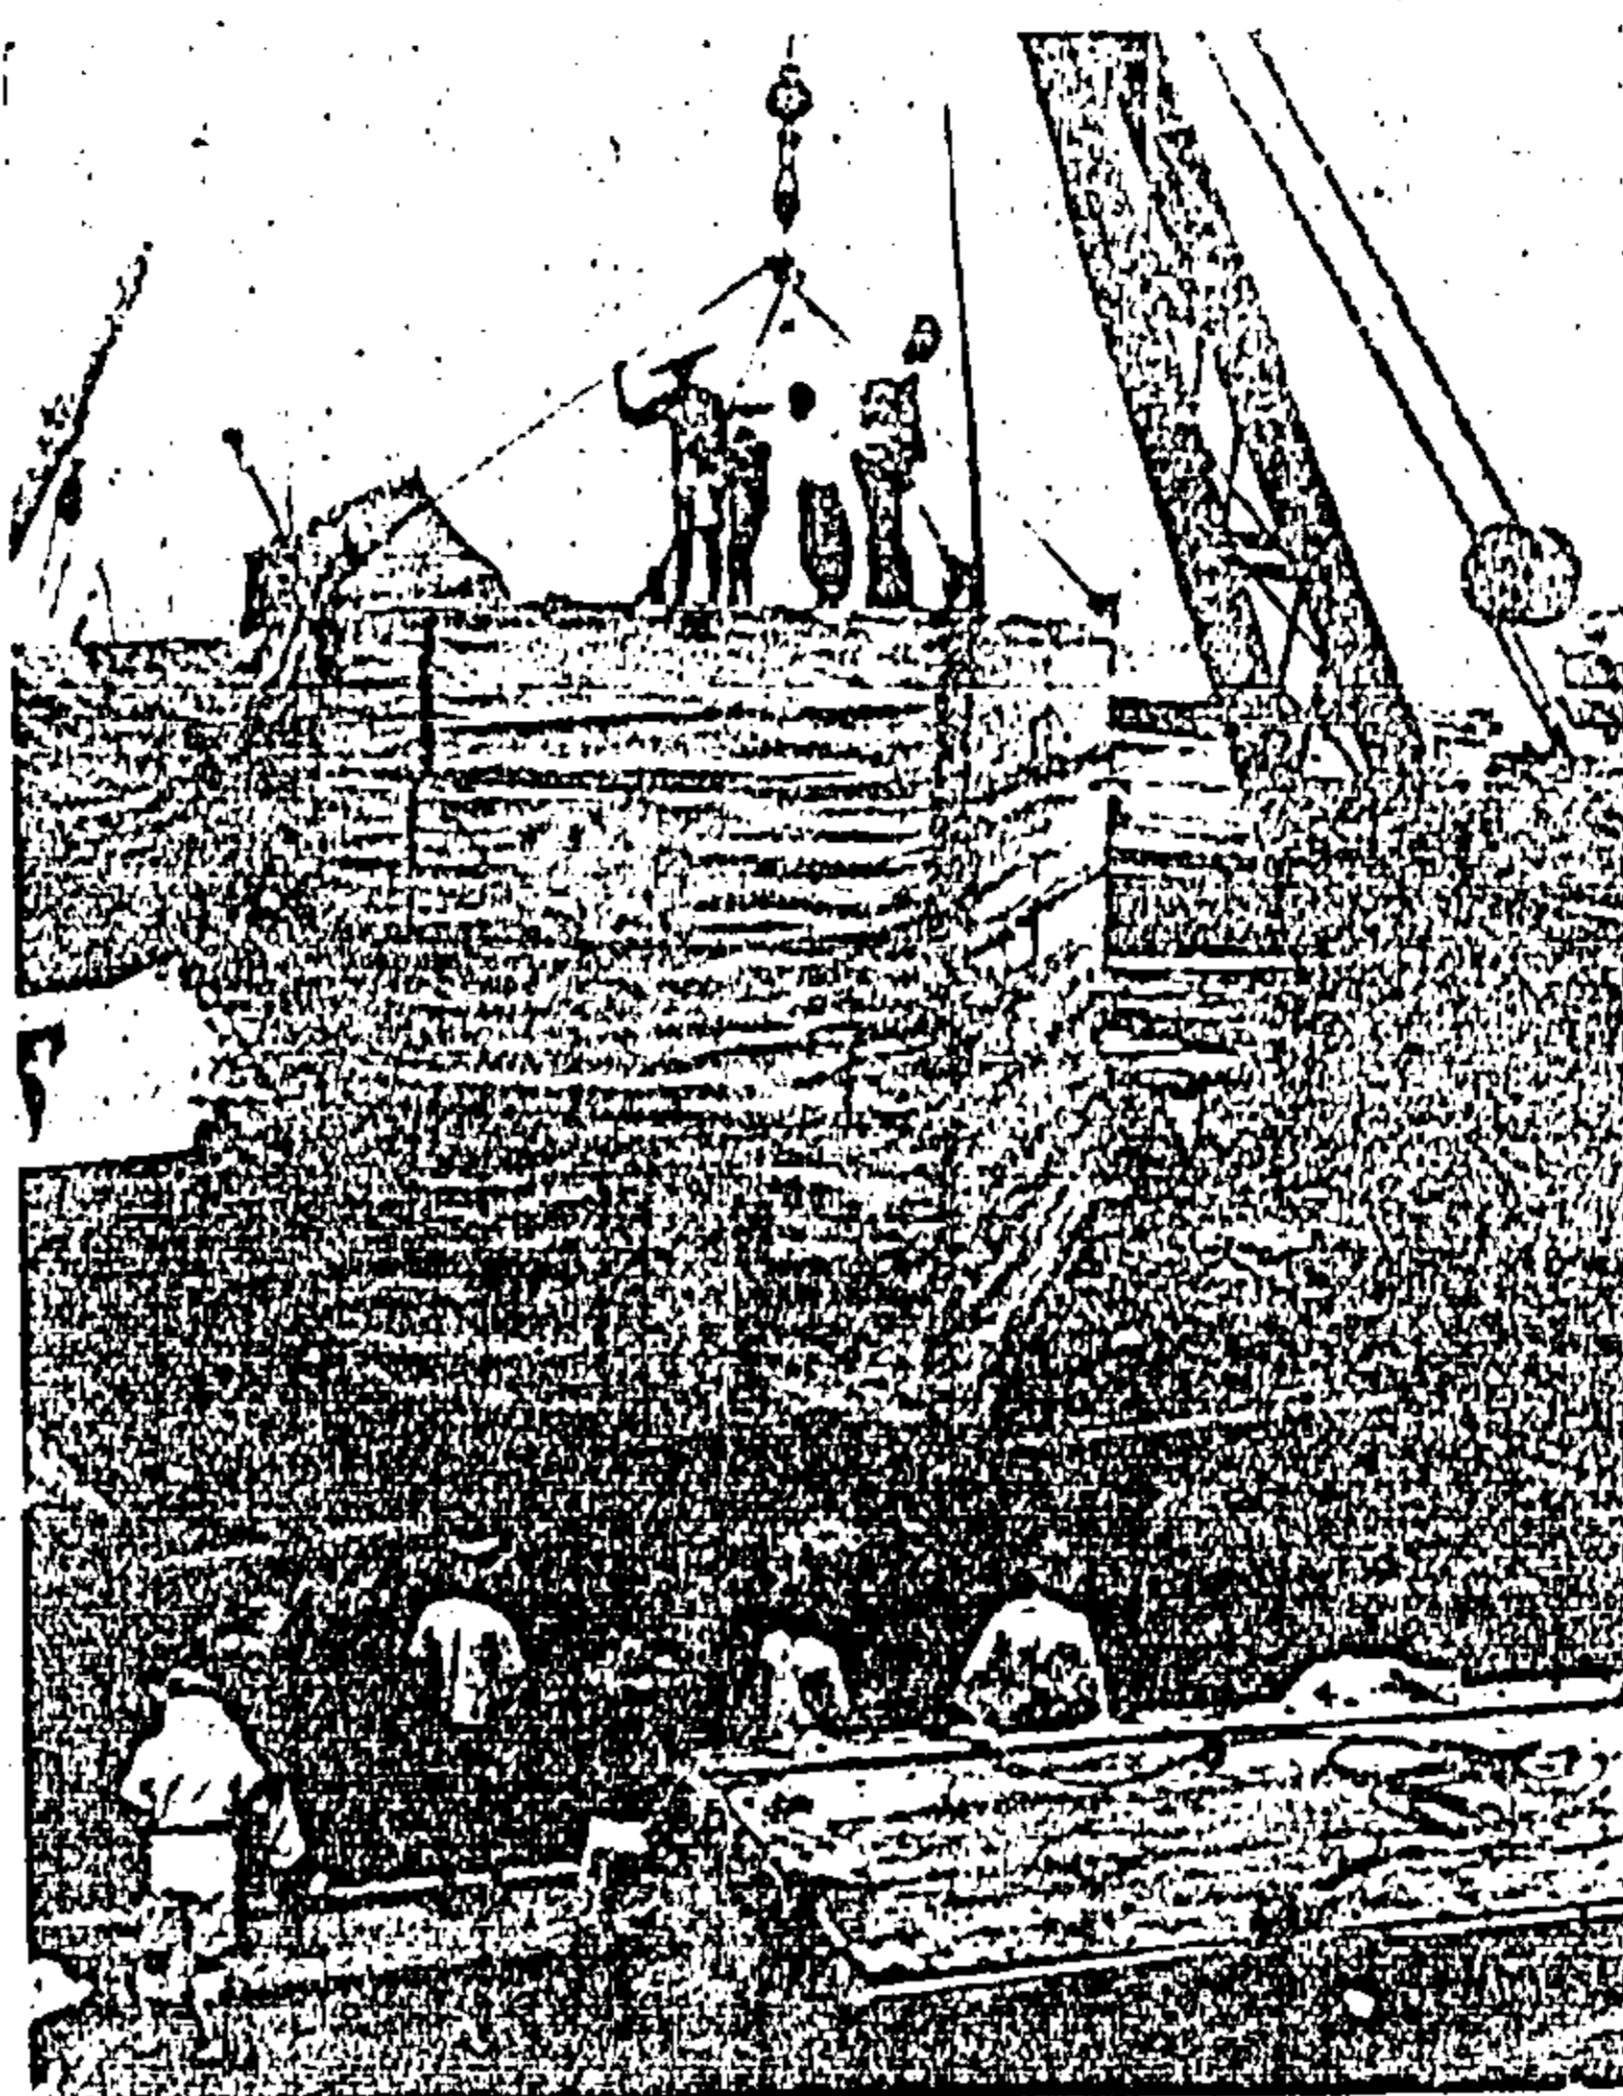

Sir John Jarvis, M.P., for Guildford, opening a youth hostel at Ewhurst Green, Surrey, recently said: "Lady Jarvis and I spent our honeymoon in Switzerland and walked 200 miles."

"I am rather afraid the young people of to-day do not set off so enthusiastically. There are too many temptations to go at a fast speed."

Sir John said he had the fullest sympathy with the excellent work the Youth Hostels Association was doing, because primarily he was a hiker himself.

The five and a half acres of ground in which the hostel stands, and £200 of the £1,500 required to build it, were given by Sir Philip Gibbs, who lives at Ewhurst.

IS THE CASPIAN SEA DRYING UP?

—Tough On Caviar Eaters

Moscow, July 2.
Soviet natural scientists said to-day they believe the Caspian Sea, the world's richest source of caviar, is drying up.

In Baku Harbour, a deep-water port, a fortress has appeared.

The investigators say the embankments were constructed 800 years ago by Persian Shahs as an outpost in the centuries of struggles between Russian and Persian armies.

Long ago it sank far below the surface of the sea in an earthquake, but still the sturdy walls remain.

After years of investigation, the natural scientists have tabulated the drying-up process of the Caspian. B. Apollon, government investigator, said the damming of rivers for irrigation was partially responsible.

Last March the Caspian dropped to the lowest level in a century and only now is beginning to rise again. The water from melting ice in the northern tributaries of the Volga and other rivers reaches the Caspian at this time of year, but calculations are that a new record low will be reached again in December.

During the last century, they estimate, the surface of the sea has been reduced by thousands of square miles.—Associated Press.

ITALIAN SENATOR DIES

Rome, July 5.
Senator Alfred Falconi, former Minister of Finance and former Minister of Justice, died to-day at his home in Dohodessola. The Senator, who was born in 1869, headed the Italian delegation to the Anti-Opium Conference held in 1924.—Havas.

Merle Oberon, Champion Deep-sea Angler

Hollywood, July 1.
Miss Merle Oberon, the young British film actress, is Hollywood's champion deep-sea angler.

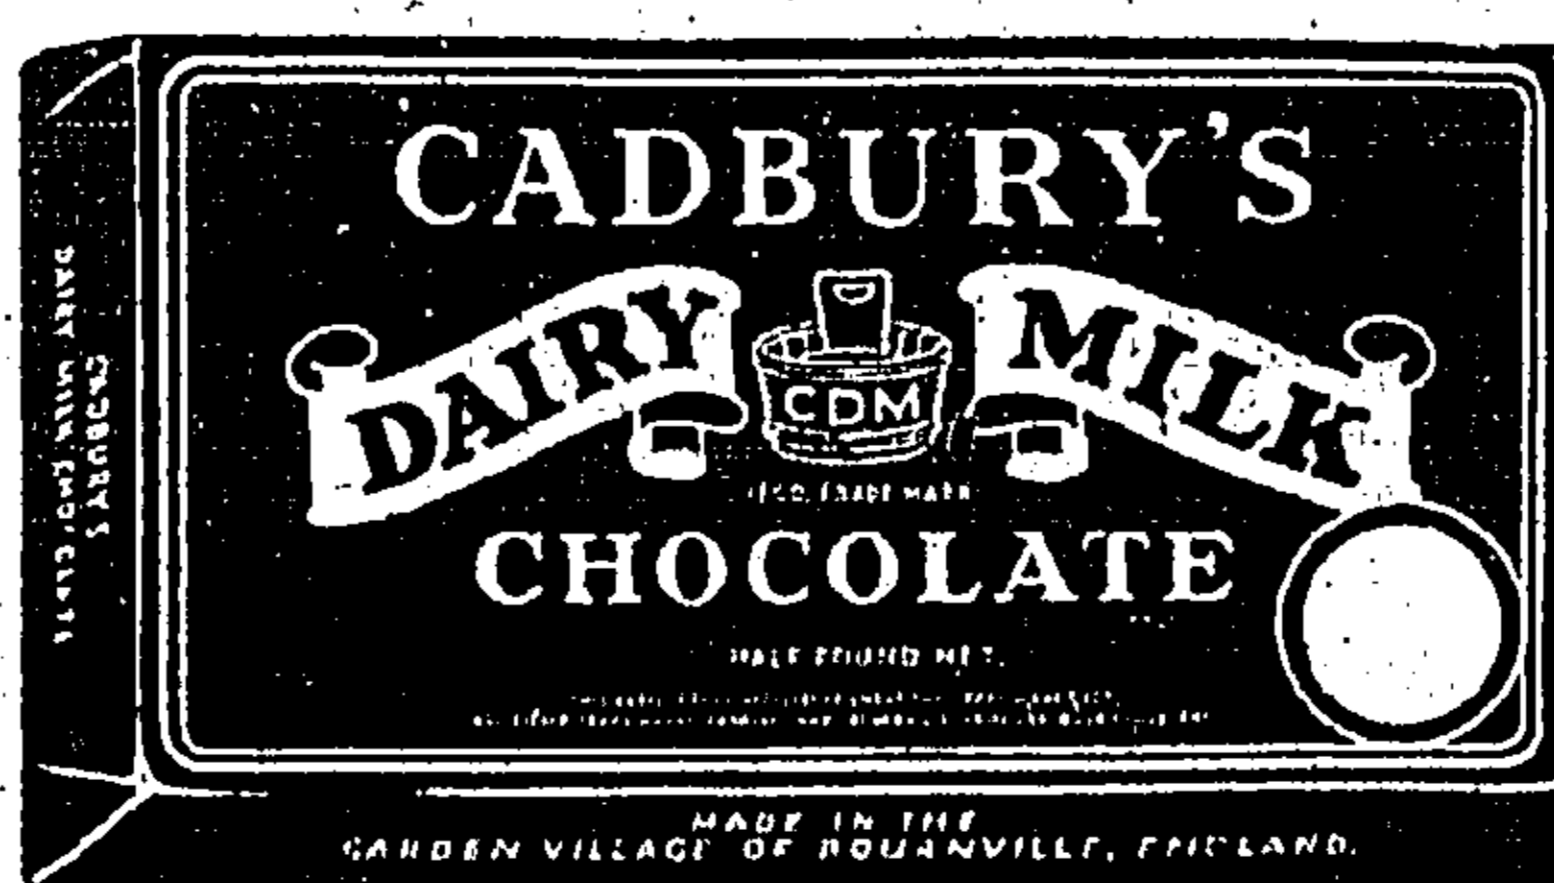

During a recent fishing trip she landed 52 barracuda in four hours—a record for members of the film colony.

Deep-sea fishing is the latest Hollywood craze, and Malibu Beach, Santa Monica and Catalina Island are daily thronged with film actors and actresses anxious to try their skill with rod and reel.

David Niven, the young English friend of Miss Oberon, is one of the leading anglers, while Norma Shearer, Evelyn Laye, Nigel Bruce, Herbert Marshall, Gloria Swanson and Walter Huston are described as "capable enthusiasts."—Reuter.

ZORIC

It's like a story of adventure. The way chemists and engineers experimented and worked to perfect this marvellous drycleaning system. But there's no mystery about the marvellous things Zoric does for your clothes. It searches out hidden dirt—cleanses the fabric ever so gently, ever so thoroughly. It perks up the nap, brings colour back to bloom, puts that new-day softness into woollens, restores the show-window luster to silks and satins. But doesn't leave a trace of odour. Sounds almost unbelievable? Then try Zoric—and see!

Italian Consul Named In Malta Spy Trial

"PAYMENT FOR PLANS" STORY BY ACCUSED MAN

Malta, June 21.

THE names of Italian consular officials in Malta were introduced to-day into a case in which Nicholas Delia, a barrister, and Joseph Flores, a tobaccoist, are accused of espionage.

Towards the end of the preliminary proceedings before a magistrate the prosecution asked that the rest of the evidence be heard in public. The doors were opened.

Then a police officer read a sworn statement which had been made by Delia who declared that he had had business relations with the Italian Vice-consul, who, four months ago, told him that the Italian Consul-general would like to see him.

Delia's statement went on to say that he was introduced to the Consul-general who said that he wished to obtain plans, sketches and information concerning the dockyard and naval matters. Payment would be made according to results.

Delia according to the statement read in court, got into touch with Flores, who introduced a man known as Mr. X. This man said he was in a position to supply the required information, the terms being cash on delivery.

BECAME NERVOUS

Later both Delia and Flores became nervous and dropped the matter. Delia told the Italian Consul that he could not carry out the arrangement.

Both men were committed for trial by the special court of three judges recently established to deal with offences under the Official Secrets Act.—British United Press.

Five Italians were deported from Malta last October "in the public interest." Two months ago another Italian was sentenced to three years' imprisonment under the Official Secrets Act.

Missing—Safe?

Various wire stories place Mrs. Hazel Archibald Draper, former Seattle, Wash., resident and wife of a wealthy Massachusetts state senator, as missing from a liner at sea and in England.

Famous New Zealand Geyser

RECORD CREATED

Wellington, N.Z., July 1. Pohutua, known to every visitor to Rotorua, although seen in action by comparatively few, created a new record for itself when it played for 17½ hours continuously.

This time was occupied by single display and not by intermittent shots.

A height of about 60 ft. was reached, which would have been considerably higher but for a strong wind. During the past few months the geyser has been exceptionally active.

DEATH SENTENCE ON SOLDIER OF 18

Sister Shot Dead and Father Wounded

YOU left the house with murder in your heart?—Yes. You intended to murder your father but by accident you did not kill him, and you did not intend to shoot your sister, yet by accident you murdered her?—Yes.

This was part of a dramatic murder trial recently at Lincolnshire Assizes.

Herbert Smith, an 18-year-old private in the Northamptonshire Regiment, was found guilty of murdering his sister Dorothy (25) at Fleet Farm, near Holbeach, and he was sentenced to death.

The jury strongly recommended him to mercy.

Smith shot his sister as she was cycling to chapel with her fiancé, and afterwards shot at and severely wounded his father, who was sitting in his house.

Smith gave evidence that he was very much attached to his mother and he blamed his father for her death, for she was obviously suffering (he said) for a long time before she went to hospital.

After his mother died he was not happy at home. "I could not get on with my father," he said.

He said that he never quarrelled with his sister about money. He did not speak to her and his father, with whom he had quarrelled.

"WOULD TAKE MY REVENGE"

Mr. P. E. Sandlands, K.C. (Smith's counsel): Did you ever tell your sister, Mrs. Powell, that you were going to shoot both of them?

Smith: I told her I would take my revenge against my father; that is all. Smith said that on Jan. 13 he injured his foot, and while he was in hospital he thought a good deal about his home. "It nearly drove me mad," he said.

Mr. Sandlands: What did you do while you were in hospital?

Smith: I made up my mind to shoot my father and myself.

Why?—Because I blame my father for my mother's death.

He added that when he came back his mind did not waver from that purpose.

Mr. Sandlands: Had you any intention or desire to hurt your sister with that gun?

No.

FIRE TO FRIGHTEN SISTER

Why were you looking out of the window?—I did not want my sister to see me. I wanted her to leave the house before I moved.

"When I got on the roadway," he continued, "I saw my sister and Drakard. I thought I would frighten her. I was going to fire over her head."

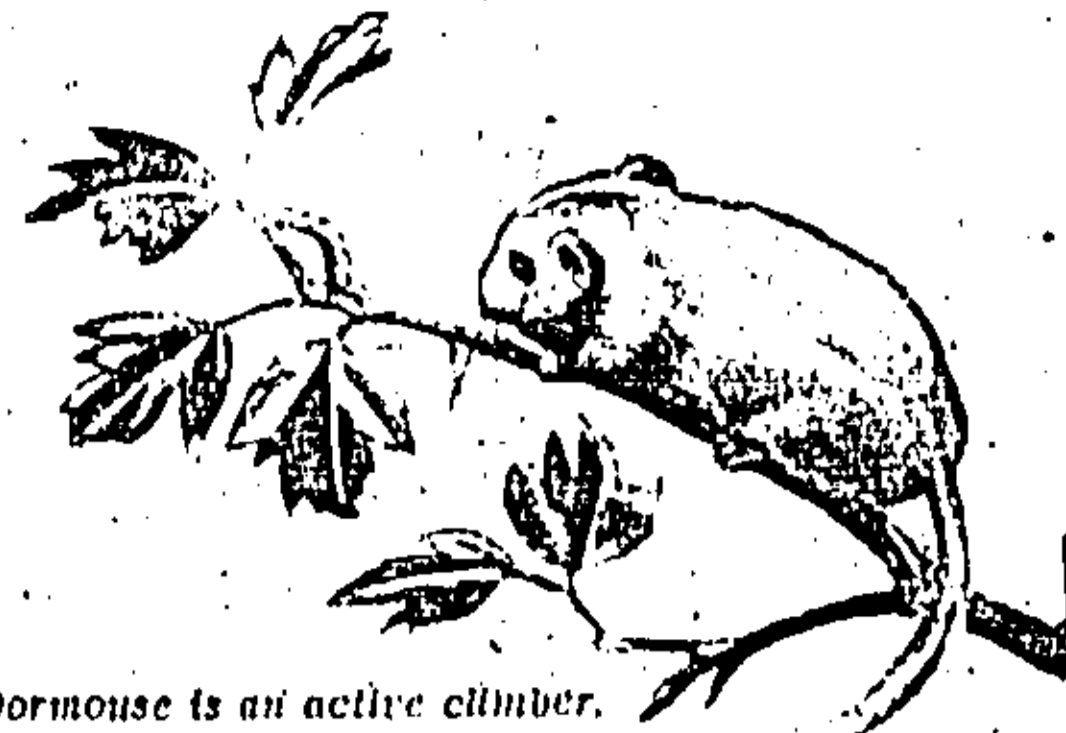

He said the stock of the gun was under his arm and he thought the

For Our Junior Readers

The FIELDMOUSE

FAMILY

Hard Workers.
—and Idlers

Dormouse is an active climber.

SECRETIVE, nimble little mice scamper about the fields and hedgerows, busy with their summer plans. Peering out of a tangle of honeysuckle, high up in the hedge, is Mrs. Dormouse, her glinting black eyes alert with watchful suspicion.

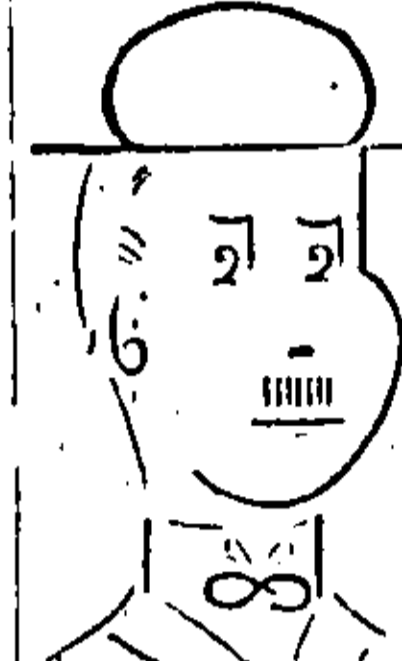

No wonder. Hidden behind the foliage is a rough, bedraggled, untidy-looking dwelling, about the size of a cricket ball. It is made of chewed honeysuckle bark, strengthened by grasses and leaves; inside are her nearly sightless babies, not yet a week old. Their chief wall is for food.

Plump caterpillars like sunning themselves on the hawthorn leaves. When hungry, the dormouse gobbles up these insects at a great speed. This nimble little mouse feeds with gusto too, on leather-jackets—the destructive grubs of the daisy-longhorn, infamous for their attacks on cricket-pitches.

When at home, the dormouse al-

DRY CLEANING PLANT

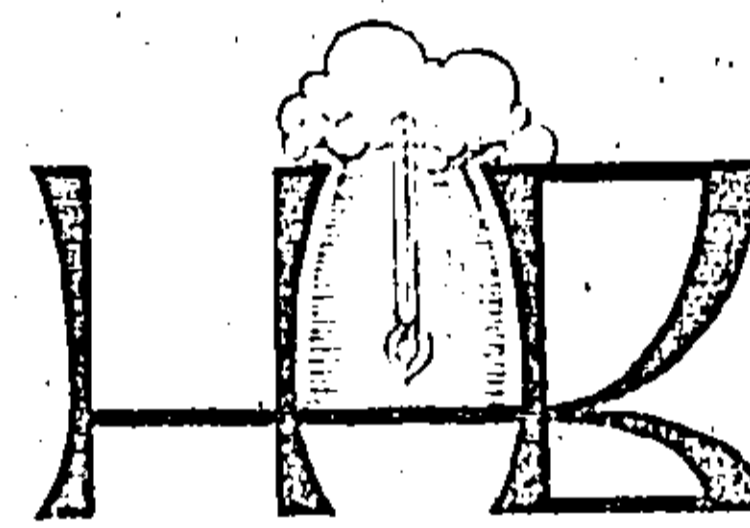

STEAM LAUNDRY COMPANY

INSTALL "ZORIC" SYSTEM

Believed to be the only equipment of its kind in the Far East, the Zoric current cleaning system has been installed by the Steam Laundry Company at a cost of some thousands of dollars.

The new system, which has come into considerable prominence in the British Isles of recent years, introduces an entirely new and effective method for every form of dry cleaning. A synthetic cleaning solvent is employed known as "Zoric Fluid" which is absolutely harmless to the most delicate fabrics; it is chemically pure and free from any oils or greases. Further, it is odourless and non-

inflammable. It is also claimed, after exhaustive tests, that not only are fabrics or garments renewed to original freshness, but that the renewal remains longer and outlasts any other system. The new plant, which has just been put into operation, has created considerable interest, and the Steam Laundry Company is to be congratulated on its enterprise.

KOWLOON MATTERS

There are a few opportunities for the exercise of civic spirit in this Colony that we welcome the appearance of another annual report of the Kowloon Residents' Association, a body which can look back on a worthy record of sixteen years' labour on behalf of the community across the harbour. It only needs a glance through the summary of the subjects dealt with by the Association during the past year to realise the K.R.A. is doing a very essential job of public service. Issues affecting the bus and postal services, road maintenance, traffic and street lighting, children's playgrounds, markets, and a variety of other subjects have engaged the attention of the Committee, with the result that the Government—with which the Association always aims to work in close co-operation, is being constantly kept in touch with the needs of residents of the peninsula—a part of the Colony which in recent years has shown great expansion and which undoubtedly has a big future. Other Residents' Associations in this Colony have come and gone, but the K.R.A. still plods on, conscious of the fact that the need for such a body grows more apparent with the passing years. The report just issued shows that the Association has not always been able to secure the action desired on several questions; but this in no wise deters the Committee from making appropriate representations in the official quarters; its record, indeed, has been one of consistent pegging away on matters that affect the amenities of life on the peninsula, and on more than one occasion its persistence has eventually moved the authorities to adopt various proposals put forward. It is to be hoped, therefore, that the matters on which the Association still feels dissatisfied will in due course receive the sympathetic consideration which is their due. The Government should, and doubtless does, perceive the value of an organisation such as the K.R.A., which, with a membership of over three hundred residents, representing all sections of the community, is competent, by reason of its first-hand knowledge, to tender advice on Kowloon's communal needs. But there are still many residents who do not give the Association the support which they should, and who probably seldom give a moment's thought to the labours of its officers on their behalf. But for the Association, mainland residents would doubtless have had to wait much longer than they did for the provision of the Kow-

The Father of the Reformation

ERASMUS,
WHO DIED
400 YEARS
AGO TO-DAY

TO-MORROW is the fourth centenary of the death of Desiderius Erasmus, the famous scholar and writer who is held to be the forerunner of the Reformation.

The quadricentenary of his death is being fittingly celebrated at the Bodleian Library, Oxford, by an exhibition of his books.

The astonishingly productive literary career of Erasmus extended from 1495 until his death on July 12, 1536 impeded, yet seldom entirely interrupted, by serious illness.

Of his earliest publications—a letter recommending Robert Gaguin's "History of France," slipped in at the end of the work apparently to fill space that would otherwise have remained blank, and some poems published in a slender volume, "De Casa Natalicia Pueri Jesu" ("Of the Birthplace of the Child Jesus")—the Bodleian has copies of the third and second editions respectively.

NOTES OF THE DAY

In promising the appointment of a woman to the British delegation to the International Labour Conference, the Government put into effect one of the principles laid down in the Charter of the International Labour Organisation. The Rules governing the composition of delegations lay down that: "Each delegate may be accompanied by advisers who shall not exceed two in number for each item on the agenda of the meeting. When questions which specially affect women are to be considered by the conference, one at least of the advisers shall be a woman."

Several countries make a habit of sending women regularly to the Labour Conference. Miss Sternberg, of the Netherlands; Miss Kjølsberg, of Norway; and Miss Hesselgren, of Sweden, are among the best known and most popular figures at the Conference. Great Britain in its day, has sent some distinguished women advisers, notably Miss Constance Smith. On one occasion she sent a woman as full Government delegate in the person of Miss Margaret Bondfield, when she was British Minister of Labour in 1930. The British Workers' Delegation regularly includes a woman adviser, usually either Miss Julia Varley or Miss Loughlin. It is interesting to see that the employers of all countries are much less susceptible to female influence than either the Governments or the Workers. Thus at the last Conference in 1935, there were four women as full delegates, and nine women Government advisers, including the picturesque figure of the Begum Shah Nawaz, adviser to the Indian Government, who acted as rapporteur to the Committee on Women's Work in Mines. The Workers that year chose no women to represent them, and only two, one of whom was Miss Loughlin, to advise them, while the Employers called in neither female representation nor female advice. The subject this year, which is considered to be of special interest to women, was the reduction of hours in the textile industry—in which, of course, a very large number of women are employed in all countries.

loon Hospital, whilst the impending opening of the new Central British School recalls another outstanding example of the culmination of insistent pressure with a view to the provision of a long overdue need. There are many other respects in which the Association has contributed to the betterment of conditions on the peninsula. All in all, the K.R.A. has good reason to be proud of its past achievements. It is incumbent on all Kowloon people to give it the support it so well deserves, whilst the Government should, by its actions, display its recognition of the value of such work as the Association is voluntarily undertaking.

ERASMUS was a restless traveller, and he paid three visits of some length to England, during which he came to both Oxford and Cambridge. He was brought over by his pupil, the Earl of Mountjoy, in 1499, and made a number of friends, with whom he remained on terms of intimacy for the rest of their lives.

Among them were Thomas More, John Fisher and John Colet. It was at Thomas More's house that he wrote "Moriae Encomium" ("Praise of Folly"), a copy of which, with pen and ink sketches by Hans Holbein the younger, is now at Basel.

Association with John Colet, Dean of St. Paul's, and founder of St. Paul's School, led to him taking part in revision of some of the school text books. He revised William Lily's "Libellus de Constructione" ("Handbook of Construction"), and the Bodleian Library has the only known copy of the first edition.

The Bodleian possesses eight autograph letters of Erasmus, of which four are shown. One was written within six weeks of his death and is signed "Erasmus of Rotterdam, from a sickbed."

There are also in the exhibition copies of portraits, statues and medals of Erasmus.

DESIDERIUS ERASMUS was the illegitimate son of Rogerius Gerardus and was born in his father's native town of Gonda (in Holland) in 1466.

He was educated at St. Lebuin's Church, Deventer and on the death of his father in 1484 went to school at Herengobosch, later joining a religious order in the House of St. Gregory at Steyn, being ordained a priest in 1492.

Shortly afterwards he became secretary to Henry of Bergen, Bishop of Cambrai, and in 1495 entered the College of Montaigu, in the University of Paris, where he won great fame as a scholar. He eked out his living by taking pupils, one of whom, William Blout, Lord Montjoy, persuaded him to visit England in 1498. At Oxford he discussed theology with John Colet and began his friendship with Linaere, Thomas More and others, but returned to Paris to his Greek studies in 1500. In this year he brought out his Collectanea Adagiorum, which contained extracts from the Classics and from the Fathers. Erasmus travelled about the Continent considerably, teaching privately and studying wherever he went.

In 1505 he paid a second visit to England, where he was wel-

FAMOUS
BRITONS
WERE HIS
DISCIPLES

comed by the scholars of the land.

In the following year he went to Italy as a tutor of the two sons of Baptista Boerio, Henry VII's physician. There he made new friendships with such men as Aldus Manutius, the Venetian printer, who published for him a new and enlarged edition of his Adagia, entitled *Chilades Adagiorum*. In Venice, Alexander Stewart, the natural son of James VI of Scotland, at whose side he fell at Flodden, became his pupil and friend, and in Rome he was honoured by all the members of the papal circle. In 1509 he again came to London and stayed with his friend Thomas More.

At the time he wrote his brilliant satire called *Encomium Morie*, in which kings, popes, bishops and the like, all came under his lash. He now visited Cambridge, where he finished his work on the Greek New Testament, and on Seneca and St. Jerome, and where he taught Greek and befriended the divinity.

ERASMUS now had a large circle of disciples, both on the Continent and in England, who were proud to look up to him as their master and teacher.

In 1511 he published *Verborum ac Rerum*, a text-book of rhetoric, and his New Testament appeared in 1516. From 1516 to 1521 he lived chiefly at Louvain, near the court, though he not infrequently journeyed to Brussels or to Basel, and in 1517 went for the last time to England. At Louvain he took an active interest in the founding of Hieronymus Busleiden's Collegium Trilingue, and there too he prepared his edition of Christian Fathers. About this time he formed a friendship with Johann Erlen, a publisher of Basel, and in 1521 Erasmus settled permanently in that town to become Froben's general literary advisor. Between 1516 and 1536 Froben's press issued a remarkable series of the Fathers, including Jerome (1516), Hilarius (1523), Ambrose (1527), Augustine (1528), and Origen (1536), which was largely the work of Erasmus, though he had many coadjutors.

Froben died in 1527, and two years later Erasmus moved to Freiburg to avoid the religious discussions that were disturbing Basel, but he returned to the latter town in 1535, where he died of dysentery in the following year.

ERASMUS never left the Church of Rome, though he refused again and again to enlist in its service against the Reformers. The Lutherans he ridiculed in his *Diatribe de Libro Arbitrio*, 1526, and Ulrich von Hutten in his *Spongia*, 1523, but the Papists equally severely in his *Colloquia*, published between 1516 and 1536. He was accused of indifference and of wavering, but it was only natural that such a Greek and sure hitter should make enemies. Erasmus was a great scholar, and had vast literary acquisitions.

THE exhibition at Oxford illustrates the wide range of his intellectual interests—so wide, indeed, that the boast imputed to a latter-day scholar: "What I know not is not knowledge" might have been applied to Erasmus. There may be seen the first edition of the New Testament in Greek, the publication of which was his most notable achievement, and with it his own Latin translation. He surely did spread a knowledge of Greek—to put an end to the authoritative ignorance which said to pupils coming across a Greek quotation in a text: *Grecum est; non legitur*. By this precious book are the large volumes of his Paraphrases, in which he expounded the Gospels and the Epistles to the unlearned that were yet not illiterate. Elizabeth repented that the English translation of this work was to be kept in every parish church in England; and it is still to be seen in some of those light-houses of Christian culture, from which the sea of secular life has never yet receded nor ever will.

Viewed through the shining veils of his exquisite Latinity, he seems a combination of, say, Dr. Inge and Mr. Bernard Shaw.

Had he lived in our days he might have found a vocation in journalism.

BULLS AND INNERS

From the Office Butts

A Chinese newspaper refers to a lady who paraded at Repulse Bay in a "one-piece bathing suit—the lower piece." It is understood, however, that she retained her sang froid.

Now that they're allowed, there'll probably be less tents than ever at Repulse Bay.

A London gossip writer states that "a new shade of orange is on the tapis." Tapi-ochre, we presume.

A local amateur weather expert stated that "typhoon green" was distinctly visible on Wednesday last. Probably due to santonin.

The gentleman who was suffering from a serious depression on Thursday, due to a low ball over Yap, filled up later in the evening.

Garlic is said to be good for rheumatism. Thanks! We prefer rheumatism.

Overcrowding is still prevalent on the buses. We suppose that some day somebody will take this count!

A Kowloon resident complains of smoke from railway locomotives. That's a funnel-little way they have.

It is estimated that with the closing down of the only licensed hotel on the Peak, the consumption of liquor on the upper levels will remain about the same.

Statistics show that Singapore is hotter than Hongkong. At what?

This holding out in one is becoming a habit in Hongkong. We Perse-ive that two players have recently Dunnett.

A lady traveller who recently passed through the Colony states that the Chinese girls dress in a most becoming manner. Becoming pretty swift.

We notice that a local lady has lost an ear-ring. That's the risk of wearing heavy lug-gage!

It is said that the movement of the arms affects wrist-watches. That's why they build town clocks.

It is asserted that Hongkong seawater contains all sorts of living organisms. We noticed one in particular the other afternoon who was determined to bacilli.

A dog bit a postman last week. It caught the mail!

CINEMA TRAFFIC AUTHORITIES SHOULD GRAB THIS FILM FOR HONGKONG

FILM now being shown in Australia could be obtained by local Traffic authorities, probably without cost.

It was made in England, recently screened there under auspices of "News of the World" newspaper. "Death on the Road" is the title.

Film was sent to Australia by English newspaper in response to request by Mr. W. J. Mackay, Commissioner of Police in Sydney.

Though primarily for use in England, the film "Death on the Road" was made only for one purpose—to attempt by means of the cinematograph screen to save life and limb on the roads.

Immediately the request from New South Wales reached London, instructions were at once given by newspaper concerned for a copy to be sent.

Nearly 10,000,000 people have already seen film at home, and millions more will see it in further 100 cinema houses where it has been booked free of cost.

Wherever it has been exhibited, reports state that it has made a deep impression, especially on children, who are primarily concerned.

"Death on the Road" emphasises that appalling road toll could be minimised by the exercise of care and courtesy on the part of all road users. Hongkong could do with this film. Presumably we are to have another "Safety First" campaign shortly. Authorities should write to *News of the World*, ask them to let us have a gratis copy of "Death on the Road."

THE UNGUARDED HOUR

Franchot Tone, Loretta Young
KING'S, COMING

"THE Unguarded Hour," is based on the successful play by Ladislaus Fodor. This is a murder mystery, not so flippantly woven as is the present vogue, but made amusing by the cheerful buffoonery and quips of Roland Young.

The plot would be blown to bits if the husband, Franchot Tone, and the wife, Loretta Young, were half as candid with each other as most devoted and happy couples are. Miss Young, returned to the screen as a K.C., marked down for the Attorney-generalship.

A perfect swine of a blackmailer turns up to demand £2,000 from the wife, in return for love-letters illicitly written by the young K.C. to a young lady when he was at Cambridge. The blackmailer suggests that should he sue for divorce at the moment the Attorney-generalship, the life-long goal of the K.C., would vanish like the scandal.

The wife, so foolishly in love, agrees to meet the blackmailer on the cliffs at Dover, pay over the money, and get the letters. By an unfortunate coincidence another wife falls off the cliff while she is there and the husband is tried for murder. And the young K.C.'s job is to prove him guilty.

What should a wife do, come forward and admit that she was on the cliff and that the fall was an accident and thereby damn her husband's career or keep quiet and pray? That is the first of her many problems.

FOOTNOTE: Typo on many things besides shipping schedules. Please note in Hongkong from north were delayed, necessitating quick change at King's "Sunder of the River" one of Britain's big films, replaced above, starting to-day.

Aviation And Newspapers Are In The News From Daventry

BY "FIRST NIGHT"

A commentary from Hatfield aerodrome on the race for the King's Cup, will be broadcast from Daventry tonight.

The trophy was presented by King George V in 1922, and King Edward VIII has signified his willingness to continue the donation. Incidentally, the cup is won outright each year. The race, which is necessarily on a handicap basis, is flown under the sponsorship of the Royal Aero Club.

6,000,000 FEET OF FILM IN '35

I understand that the Annual Report of the Film Censor, to be released shortly, will disclose that a record number of films went through censorship bands last year.

The footage is believed to exceed 6,000,000. Many films were banned during the year, chiefly because they offended the new rule regarding the use of weapons. Other films were cut to such an extent that their entertainment value was rendered practically worthless.

America was the predominating country of origin of films screened in the Colony. More Chinese films were screened, and there was a falling off in the number of British pictures.

For obvious reasons, the course is changed each year, the actual route to be followed by the competitors being kept a close secret until a day or two before the race.

Actually, there are two races, an eliminating contest taking place on the day previous to that of the race itself.

Last year, the competitors' course in the eliminating stage consisted of two laps over a route beginning at Hatfield, thence to Norwich, Leicester, Bristol, Salisbury, Shoreham, Coventry, and so back to Hatfield. The total distance flown was 1,260 miles. A much shorter distance has to be covered during the final race, seven laps of the course, totalling 350 miles, having to be flown.

Last year's winner was Flight-Lieut. Tommy Rose, who piloted a Miles Falcon machine for the entrant C. A. Powis. Rose's speed of 176.28 m.p.h. established a record.

Several famous names are among the list of entrants for this year's contest: H.R.H. the Duke of Kent has entered a Percival Mew Gull machine—reputed to be the fastest plane in the race—which will be flown by E. W. Percival. Wally Hope has a double interest in the event—he has entered a machine, but will himself fly for another owner, Mrs. Amy Morrison will fly a British-Aircraft Eagle for W. A. Phillips. Friendly rivalry between husband and wife is shown by the individual entrants of Viscount and Viscountess Wakefield, Lady Wakefield's representative being Flight-Lieut. Tommy Rose.

Broadcasts will be from Transmission 3 at midnight to-night and Transmission 6 at 10.55 a.m. to-morrow, both H.K.T.

★ ★ ★

SOMETIMES it has an ignominious end; a wrapping for fish and chips or a substitute for a carpet underfelt. Sometimes its life is carefully preserved; a unique contemporary record of history in the making. There is nothing else like it; large sums of money must be spent that it may come to you—thousands of men and women must labour. But the price of a box of matches is all that you pay for your daily newspaper.

The daily marvel of its production, of course, has been the inspiration of countless books and—it seems—almost as many films. And it is fitting that broadcasting, too, should give it reflection—as it soon will in the BBC's Empire programmes from Daventry.

"Late Extra" is the title of the programme, which, presented in documentary style, will take listeners behind the pages, and show them not only how the words get on to paper, but how the paper itself comes into being. Your newspaper begins in a timber forest. So that is where the programme will begin: in a forest in Newfoundland. Lumbering and pulping processes are the first stage; they will be accurately represented in a picture that will have been painted with authoritative assistance—that of the Newfoundland Government.

And then, to the editorial offices: to the gathering of the news by agencies and reporters and correspondents (and is any other human net so close-meshed?). From the editorial to the printing rooms, where, every day, examples of dexterity are definitions of dexterity are nonchalantly produced amid the clatter of linotype machines, the bang of hammers, the thunder of mighty presses. And unwrapping it all is a scent that no one who has helped to make a newspaper ever gets out of his nostrils.

They "put the paper to bed." The press runs. A roll of white paper that once lived in Newfoundland spins itself out into a chaos of whirling wheels and rollers. The late extra is being run off. You can't produce a newspaper without also producing a number of interesting noises—which, from the broadcaster's point of view, is fortunate. Many of these noises will probably be heard in this programme—the BBC's mobile recording unit, it is hoped, will visit the home of a great London newspaper to recapture illustrative sounds.

S. E. Reynolds is responsible for devising the programme, in which he has been considerably helped by the co-operation of the Newspaper Proprietors' Association and the Newfoundland Government. Production will be in the hands of Pascoe Thornton.

Transmission 3. To-morrow 10 p.m. H.K.T.
Transmission 4. Monday, 5 a.m. H.K.T.

WAS IT TRUE?

(See Page 3.)

1. Wrong. For example, in New Zealand, 1931, the ground was suddenly pushed up twelve to sixteen feet.
2. Right.
3. Right. Thomas Savery patented one in 1689.
4. Right.
5. Right. 1,300ft below ocean level.
6. Wrong. Many were thus sacrificed during wars.

On Your Gramophone

STEAMER GOING OVER...

HENRY HALL ought to take up song-writing. Maybe he would not choose that career for himself, but he is becoming expert in the provision of theme songs for all occasions: time for dancing, the next time, and time to say goodnight. (Three times a tune with "Time" in the title.)

In these days when signature tunes are the fashion and only the faintest excuse is needed for the playing of one, it was obvious that the Queen Mary would get hers sooner or later.

And who should have written it, of course, but the Theme Song King, Henry Hall himself?

Picking up a Columbia record (FR 1300) it was a bit of a shock to find that only one of the two labels bore the familiar semi-quavers known as the "Magic Notes." The other is decorated with a broadside view of the Queen Mary in gold on a blue ground.

Henry Hall's latest opus, recorded by the B.B.C. Dance Band, is called "Somewhere at Sea," and is, indeed, described on the label as the "Official Signature Tune of R.M.S. Queen Mary."

The geographic indiscretion of the song's title, I feel, is not quite in keeping with the league-by-league reports of the last week, but at least it is a pleasing tune and sufficiently romantic to be successful.

★ ★ ★

IT is only in the past two years that jazz has become organised. To-day, though, it is more than a "new" music, always provided you call it "swing music" and cannot for the life of you define "swing."

Just how well organised and how much trouble people will take in the organisation of jazz I did not realise until I received a copy of a book by Hilton R. Schlemmer called "Rhythm on Record" (published by the "Melody Maker," 7s. 6d.).

This book is a Who's Who and register of recorded dance music from 1900 to 1935.

You look up the name of any band leader, any individual musician playing in said band leader's band, and this book tells all: age, biography, and the name of every record (and its number) in which the person concerned has ever played.

Speaking from personal experience, I hand it to the compiler of this work that he has remembered things that at least one person mentioned therein

"Henry Hall, the Theme Song King"

had long forgotten... However much, however little, you know or care about jazz, this is a fascinating book; for me at any rate it has the inevitable attraction of all "shop" talk, whether you work in that shop or not. And it is full of excellent, and sometimes very rare, photographs.

You Should Like—

KIRSTEN FLAGSTAD. This great Wagnerian, soprano offers two more records for you to remember her by. "Eliabeth's Prayer," from "Tannhäuser" (H.M.V. DB2747), "Elen's Dream," from "Lohengrin," and "Eliabeth's Greeting," from "Tannhäuser," on DB2748.

LOST. Short title, sweetish tune. Recorded so far by Ruth Etting (Brunswick 02218), Guy Lombardo (H.M.V. DB2071), Carroll Gibbons (Columbia FD1408).

CHRISTOPHER COLUMBUS. And still they come in: Krakalax (Parlophone F468), Louis Garcia (Regal MR2103), Andy Kirk and his 12 Clouds of Joy (Columbia DB5000).

COLL. Popular Italian tenor sings two popular Italian songs: "Mak-tinata" and "Torna a Surriento" (H.M.V. DA1454).

THERE'S no music so blithesome as that of a bagpipe... and you'll find no whisky with a flavour to match that of Teacher's "Highland Cream," the grandest Scotch that ever came out of the Highlands. Teacher's inimitable flavour appeals so greatly to lovers of good Scotch that it has built the largest independent distilling business in all of Great Britain. Bottled in bond in the United Kingdom under government supervision by WM. TEACHER & SONS, LTD., GLASGOW and LONDON. Established 1830.

CURRENT AFFAIRS TEST

How To Do It

FIVE possible answers are given for each question. You select what you think is the correct answer, and put its number on the line at the right of the number of the question on the answer sheet.

Example: O. The Prime Minister of Great Britain is (1) MacDonald, (2) Chamberlain, (3) Hailsham, (4) Baldwin, (5) Lloyd George.

Baldwin is the correct answer. The number of this question is O; the number 4 (meaning Baldwin) has been placed at the right of O on the answer sheet.

At the end of the Test check your replies with the answers given on Page 2. **AND DON'T PEEK!**

In our opinion, 20 is a good score, 25 very good indeed. There are no prizes.

THE LAW IN FICTION AND FACT

Villain Destroys Will

THE fate of innumerable fortunes in fiction has depended on whether the villain will succeed or fail in his nefarious design to destroy the will.

The hero or heroine is, of course, the chief beneficiary under the endangered document; the villain is either the beneficiary under a former will or else a worthless son who has already received and spent his share of the family estates.

The villain almost invariably fails in his wicked scheme, but we are left with a sense of injustice narrowly averted. But even if the villain had succeeded, it is extremely doubtful whether he would have gained anything by his felonious plan.

To begin with, neither the villain nor any one else can ever receive anything under an earlier will. By an Act of Parliament which celebrates its centenary next year it was provided that the destruction of a later will, even by the testator himself, never in any circumstances revives an earlier will.

If a man revokes his will, no matter if he has made fifty earlier wills which are still in existence, he dies intestate. Once a will is revoked (and a new will is sufficient to do this), nothing can revive it except making it all over again.

So only the intestate's next-of-kin ever stand to gain anything by the destruction of a will. But this does not mean that a disinherited son can secure his intestate share by making away with his father's will. The destruction of a will only revokes it if it is deliberately destroyed by the testator himself.

It is true that the law presumes, if a will cannot be found, that the testator destroyed it himself. This presumption only operates, however, when the testator had possession of the will and the court is satisfied that the will was not in

existence when the testator died. Even when both these conditions are satisfied, it is still open to the beneficiaries to go to the Probate Division of the High Court and prove that the testator did not, in fact, destroy the will himself.

Thus in one case it was sufficient to show that the testator had been ill in bed ever since the will was last seen until his death; in another case the court accepted evidence that the testator had reaffirmed his affection for the chief beneficiary as showing that his will had not been revoked.

How do the beneficiaries prove what was in a will which no longer exists? Wills are usually made by solicitors, who, before they prepare the final document, draw up a draft for their client's approval. Any careful solicitor will keep this draft, not so much for fear of melodramatic misappropriation by the intestate heir, as to provide against the loss or accidental destruction of the will.

In many cases these drafts have been accepted by the court as evidence of what was in a lost or destroyed will.

Even when a man makes his own will, the beneficiaries under it are not by any means in a hopeless condition. A home-made will is usually short, and the witnesses may have read it; or probably the testator told some one what was in it.

There was even a case where the only person who had seen the contents of a lost will was the daughter of the testator, who stood to gain considerably under it. (At that time the eldest son took all the land of any one dying intestate.) Keeping in mind that the daughter might be biased, the Probate Court was satisfied of her integrity, and accepted her evidence of what was in the will.

Moral. If you really do want to revoke your will by destroying it, destroy it when people are about, and do not just slip it secretly into the fire.

Home Affairs

1.—Sir Samuel Hoare, the newly-appointed First Lord of the Admiralty, resigned from the Government last year because (1) he is a fanatical free trader (2) he disapproved of our attitude towards Japanese intervention in China (3) he wanted a bigger Navy (4) he had committed himself to unacceptable proposals for the partitioning of Abyssinia (5) he was not in favour of "sanctions" against Italy.

2.—The Lord High Commissioner of the Church of Scotland (of which the General Assembly meets this week) is (1) The Duke of Atholl, (2) Mr. Ernest Brown, (3) Lord Aberdeen, (4) Sir Ian Hamilton, (5) Lord Kinnaird.

3.—Discussion of Britain's debt to the U.S. (a legacy of the Great War) has once again been postponed. The amount which Britain is normally in arrears is now approximately (1) £2,000,000,000, (2) £4,315,000,000, (3) £58,000,000, (4) £419,000,000, (5) £127,000,000.

4.—The sympathy of British subjects with an exiled monarch has recently been given practical expression. The monarch in question is (1) the Emperor of Abyssinia, (2) the ex-King of Spain, (3) the ex-Kaiser Wilhelm II, (4) the ex-King of Portugal, (5) the ex-King of Siam.

5.—A Bill will shortly be submitted to Parliament which has reference to the Government of (1) Cyprus, (2) Malta, (3) Hongkong, (4) Ceylon, (5) Newfoundland.

6.—M. Leon Blum, the new French Premier, was the subject of sarcasms and criticism when the new Chamber met last week because: (1) He is a pacifist, (2) he is a "highbrow," (3) he is a Catholic, (4) he is a Freemason, (5) he is a Jew.

7.—Chiang Kai-shek, who is in the news this week is: (1) Head of the

"reformist" government at Canton, (2) Japanese commander in Manchukuo, (3) representative of China at Geneva, (4) head of the Government at Nanking, (5) Admiral in command of the fleet at Tokio.

8.—Heavy shipments of gold have been made from France lately. These are due to: (1) The activities of speculators on the New York Stock Exchange, (2) the expectation of a further decline in the value of the franc, (3) the requirements of French tourists overseas, (4) the purchase of foreign foodstuffs on account of the general strike, (5) payment of the American war debt.

9.—A striking feature of M. Blum's new Government is that: (1) No member of the administration is under 40, (2) a number of the Ministers have refused their salaries, (3) no member of the Cabinet has previously held office, (4) women are for the first time included in the administration, (5) none of the Ministers is over 60.

General

10.—Count Camille Cavour died in June, 1801—75 years ago. He was famous as (1) one of the architects of Italian unity, (2) discoverer of a new chemical element, (3) composer of light opera, (4) the Viennese school, (5) the first man to cross the Channel in a balloon.

11.—South Australia, which is this year celebrating its centenary, was founded by (1) Captain Cook, (2) David Livingstone, (3) Charles Darwin, (4) Lord Shaftesbury, (5) Gibbon Wakefield.

12.—This week was celebrated (on July 8) the centenary of the birth of (1) Joseph Chamberlain, (2) Cecil Rhodes, (3) Lord Balfour, (4) William Ewart Gladstone, (5) Thomas Hardy.

13.—General Slawoj Skladkowski was recently in the news as (1) The last survivor of General Denikin's staff, (2) new commander of the Soviet army, (3) Polish Minister at the Court of St. James's, (4) Prime Minister of Poland, (5) Governor of Archangel.

14.—Excitement has been caused in London by the discovery of a first edition of "Alice in Wonderland." A prominent character in this book is (1) the Pobble who had no toes, (2) the Red Queen, (3) the Cheshire Cat, (4) Gunga Din, (5) Captain Hook.

15.—The Quai d'Orsay (so often in the news) is a figurative term for (1) the French secret service, (2) the French foreign office, (3) the Assembly of the League of Nations, (4) the international drug traffic, (5) the dress-designing establishments of Paris.

16.—Dum-dum bullets which have not been supplied to Abyssinia, are: (1) bullets filled with high explosive, (2) exceptionally large bullets, (3) bullets which burst into flame, (4) soft-nosed bullets which expand on contact, (5) bullets smeared with poison.

17.—A Congress of Philatelists was held recently at Palngton. Philatelists are (1) representatives of organized charity, (2) experts in stuffing dead animals and preparing their skins for exhibition, (3) archers, (4) stamp-collectors, (5) experts in the use of deadly poisons.

Art and Books

18.—The famous "Barcarolle," occurs in (1) Le Nozze di Figaro, (2) Rosenkavalier, (3) Cantes d'Hoffman, (4) Tristan und Isolde, (5) Louise.

19.—The film of "Romeo and Juliet" has recently been completed in Hollywood. The Juliet is Norma Shearer and the Romeo is (1) Clark Gable, (2) Franchot Tone, (3) Ronald Colman, (4) William Powell, (5) Leslie Howard.

20.—"Candida," revived at Newcastle-on-Tyne in celebration of the People's Theatre Jubilee is by (1) St. John Ervine, (2) A. A. Milne, (3) John Galsworthy, (4) Bernard Shaw, (5) Granville Barker.

21.—The part of the doctor in the film "The Country Doctor" was played by (1) Jean Hersholt, (2)

Paul Muni, (3) William Powell, (4) George Arliss, (5) Robert Donat.

22.—"The Country Doctor" has as its theme (1) the importance of sterilising milk, (2) the benefits conferred by National Health Insurance, (3) the career of the Dorian quintuplets, (4) the value of bacteriological research, (5) the hardships of the early pioneers in the Yukon.

23.—"Defender of Democracy," by Emil Ludwig, is a book about (1) Woodrow Wilson, (2) ex-President Masaryk, (3) M. Venizelos, (4) Mr. Lloyd George, (5) General Smuts.

24.—Hongkong's film censorship is chiefly because films are too (1) sepy, (2) gangster type, (3) immoral, (4) political, (5) Sinophobic.

25.—A new novel has been published by the author of "Trent's Last Case," most famous of all detective stories. Its author is (1) Freeman Wills Croft, (2) Dorothy Sayers, (3) Agatha Christie, (4) E. C. Bentley, (5) Ellery Queen.

26.—The pageant of "Hiawatha" (with music by Coleridge Taylor) was staged recently at the Albert Hall. The words are by (1) Lord Tennyson, (2) Longfellow, (3) Kipling, (4) Grey Owl, (5) Ella Wheeler Wilcox.

Sport

27.—There has been launched at Gosport the Endeavour II, Mr. T. O. M. Sopwith's new challenger for the America's Cup. It is hoped she will be a faster boat than the Endeavour I, because (1) she has 8,200 square feet of sail as against 7,650 square feet, (2) she is fitted with auxiliary engines, (3) she weighs less, (4) she is fitted with a smaller rudder (5) she is four feet longer.

28.—The lawn tennis sensation of the week was the easy elimination of Jack Crawford from the Wimbledon Singles Championship. He was defeated by (1) van Gramm, (2) Perry, (3) Austin, (4) Budge, (5) Quist.

29.—Arsenal, the football club, have been fined £250 (subject to appeal)

NAME CHART

Violet

THIS name signifies sweet contentment, a tender, peace-loving disposition. Sunday is your day of fortune, and the hours of 2 p.m. and 11 p.m. are the luckiest and the 25th day of the month is the best if your name is Violet.

The colours that vibrate to your personality are all shades of blue except the palest tints, which are not in harmony with your name. Make use of these colours in your schemes of decoration and in your personal adornment. Your lucky gem is the sardonyx. It gives you vivacity and adds to your charm. Your lucky number is four, and your flower is the heliotrope.

Girls' and Boys' Corner

Dear Kiddies,

I was glad so many of you got the right names of the fish which the little boy caught, although one competitor did not attempt to solve the puzzle, merely sending in a nicely coloured picture of the drawing.

It was not an easy task picking the winner, but, after taking age and neatness into account, I have decided to award the senior prize to Jill Eager (12 years), 5 Bowen Road, and the junior prize to Leslie Giles (8 years), 8 East Block, Queen's Road.

Will Jill and Leslie call at the "Telegraph" office for their prizes? Specially commended for good work are Edwina Rozario, Nina Del, Pat Losley, Norris Giles, Celeste Marques, Fernando Alves, Sheila Charn Abbas, Andrew Choa, and Ho Man-chan among the Seniors, and Claude S. Coom, Denis da Roza, Reginald Martin, Diana Hosking, and Eileen Andrew among the Juniors.

NEW COMPETITION

A new form of competition is presented this week. Here is a list of

six well-known flowers. The letters have been jumbled, however. Can you rearrange them so that each flower name is spelt correctly?

ADSIESI
LOFDIDSAT
SPUNIL

UCRSO
SNIAPES
OSPIPEP

When you have solved the names, write them out in the form of a list. There will again be two prizes—one for children from 10 to 14, and the other for those under 10. The Seniors must not only solve the names, but must also draw one of the flowers and colour it. The Juniors are asked only to give the correct names. Age and neatness will be taken into account in awarding the prizes.

C. S. COOM
Last week's
Junior winner.

Entries should be addressed to Uncle Eddie, c/o "Hongkong Telegraph" and reach him not later than 4 p.m. on Wednesday.

A GAME to PLAY INDOORS

A Drawing Race is Good Fun!

"WHAT shall we do now?" is questions fired at them during the evening. The cry that goes up on process. No words may be written help you solve the problem.

You need not be an artist to enjoy this exciting drawing race. Divide the players into two teams. The side finished first is the winner. The first person of each team is sketched "Hongkong's Peak" on told the first picture. They rush to their own sides and draw drawing an entirely black picture. The picture in any way that they But you can do better than that. Please in an effort to make their by drawing a map of China and team guess it. The artists may then a buoy in the harbour to only answer "yes" or "no" to the Illustrate "Chinese Boy" and so on.

P O E M

I am going back to China
For her many little streams
Seem to sing a song that calls me
And her temples haunt my dreams.
I am going back to China
And I'm starting back to-day
To the land of calm and lotus
Where the winds of Asia play,
Where there's many tall pagodas
That are dimly seen at night.
And the moonlight strikes the rice-fields
And embroiders them with light.
There is beauty in her sunset,
There is laughter in her day
So I'm going back to China—
And I'm going back to stay.

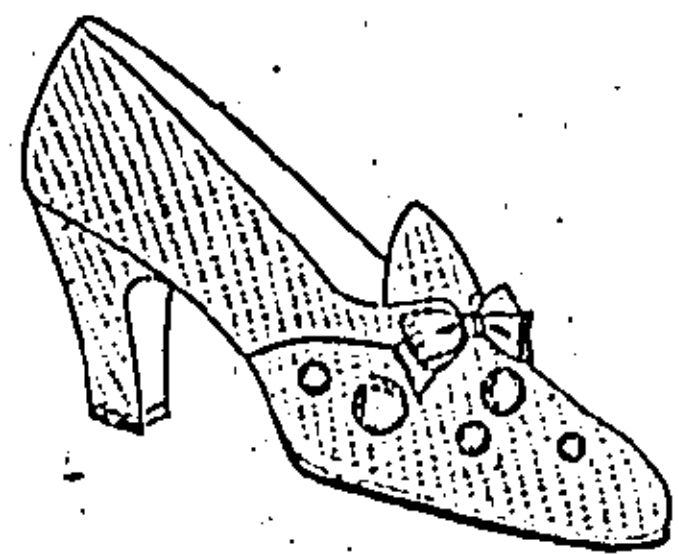

J. Wooster
Hongkong.

Is It True?

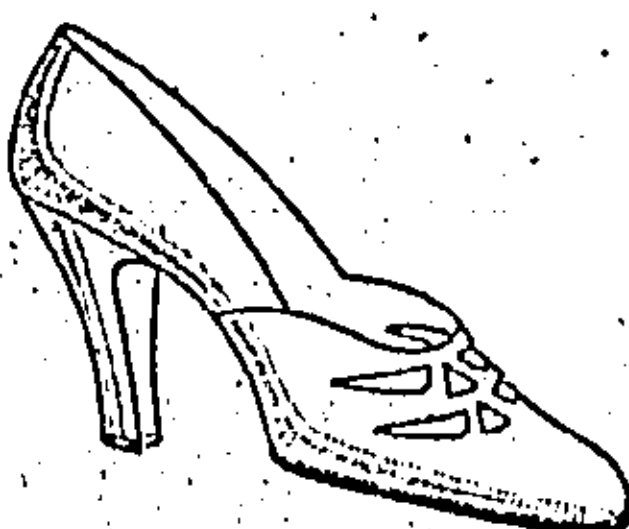

Some of these statements are right. Some wrong. Do you know which?

1. No matter how violent the earthquake, the ground does not move up or down more than a few inches.
 2. Lizards can grow a tail to replace a lost one.
 3. Steam engines were employed to pump water out of mines before 1700.
 4. A hundred years ago the average baby could only expect to reach forty years of age.
 5. The Dead Sea is the lowest spot on the earth's surface.
 6. The Romans never offered human sacrifices to their gods.
- (Answers on Page 2)

LARGE TELESCOPE FOR H. K. HISTORICAL INSTRUMENT

ABOVE.—A fine photograph of the telescope, which is the second biggest Refractor and third biggest telescope in China. The Objective is 13.4 inches in diameter.

TOP LEFT.—A Seminarian using the new telescope at the Regional Seminary, near Aberdeen village, during a recent test mounting.

LEFT.—The Regional Seminary, Aberdeen, where the large telescope shown above is mounted.

INSTALLATION ON ISLAND Third Largest Telescope in China: Astronomy Phillip

WAS ONCE BIGGEST IN THE WORLD

(Specially Written for the "Telegraph")

DUE TO THE INITIATIVE OF THE IRISH JESUITS, HONGKONG IS SHORTLY TO HAVE THE THIRD BIGGEST TELESCOPE IN CHINA, AN INSTRUMENT WHICH, AT ONE TIME, WAS THE LARGEST IN THE WORLD.

The telescope, which has an Objective 13.4 inches in diameter, as compared with the Royal Observatory's 6½ inch Refractor, is in process of being installed at the Jesuit Regional Seminary overlooking Aberdeen.

Test mountings have already been carried out, and it is anticipated that the instrument, which will be used to aid in the complete training of students for the priesthood, will be in operation in the near future.

By a strange coincidence the telescope, which is over a century old, has a previous link with this Colony.

It comes from Markree Observatory, Co. Sligo, in the north-west of Ireland, where, from 1874 to 1883, Dr. W. Dobereck, afterwards first Director of the Royal Observatory in Hongkong, was Director. Dr. Dobereck left Markree Observatory in 1883 to establish and become Director of the local institution.

The Study of the Stars is not a thing of to-day or yesterday; it goes back to the very dawn of history. That is true of China as of every other country. Chinese tradition tells us that Fu Hsi, one of the Primeval Five Emperors, whose reign began about 2852 B.C., was the first to institute astronomical observations. During the reign of the Emperor Yao, knowledge of the motions of the sun, moon, and planets was so well advanced that a year of 360 days was introduced and divided into months, with an intercalary month to regulate the seasons. It is even claimed that the 10-year cycle was discovered about the same time. In the Annals there is mention of some 900 eclipses, practically all of which have been verified. From 611 B.C. to 1640 A.D., 370 observations of comets were made. Sunspots were noted as early as 300 A.D. About 350 B.C. a star catalogue, giving the position of 120 fixed stars, was published.

ASTRONOMICAL INSTRUMENTS
In 1100 A.D. we find traces of astronomical instruments in China. During the Yuan Dynasty a group of instruments was made in Peking by Kuo Shou-ning. With the inauguration of the Ming Dynasty in 1368 these instruments were removed to Nanjing and set up there by Pei Chi-ko. A new set was later made for Peking when that city was restored as the Capital. Towards the end of the Ming and the beginning of the Ching Dynasties Jesuit Missionaries, notably Ricci, Schall and Verbiest introduced western astronomy into China and made the necessary instruments. Six instruments were mounted during the 17th century, two others were added later. These are now in the former Peking Central Observatory. The other ones have been brought to the Purple Mountain Observatory near Nanjing.

THE TELESCOPE

The invention of the telescope made all the difference in the world to the "Science of the Stars." The story of which became ever greater and grander as the higher, powered glasses probed deeper into space, revealing suns and systems of suns whose existence may have been suspected but which were not known. The first modern observatory to be founded in the Far East was that of Manila, which was established in 1805 and raised to the status of an official observatory in 1884. Up to the end of the last century it was in the care of the Spanish Jesuits. It is now under the joint direction of Spanish and American Jesuits. The chief instrument of the astronomical section is a 19 inch. (482 mm) Refractor, the largest in the Orient. The next in point of size is the Hongkong Observatory which was established in 1883 and equipped with a 6½ inch (163 mm) Refractor and other instruments.

In 1900 Pere E. de la Villomagne, S.J., established an astronomical section of the Zikawei Observatory at Zou, a hill near Sungkiang, Kiangsu, about 15 miles from Shanghai. This like the parent house, which is devoted to meteorology, is under the direction of the French Jesuits, and is equipped with a Twin Refractor of 16 in. (400 mm) aperture, for visual and photographic work; a smaller twin instrument of 100 mm. and a photographic telescope of 150 mm.

Nine years later Dr. Meyermann founded the Observatory of Tsingtau with a Twin Refractor of 12½ inch (320 mm.). This Observatory passed in 1921 into Chinese control. In 1929 the Sun Yat-sen Observatory, Canton, came into existence under the directorship of Dr. Y. Chang. It is equipped with a 160 mm. Refractor and a 100 mm. Astro-camera.

The largest and the most perfectly furnished is the one founded at the Purple Mountain Observatory outside Nanjing, belonging to the National Research Institute of Astronomy of the Academia Sinica. The chief instrument is a 24 inch (600 mm.) Reflector, the biggest glass in the Far East and, as far as is known, the only one of its kind in China. This Observatory has also a 200 mm. Refractor and a 150 mm. Astro-camera.

WAS WORLD'S BIGGEST
Now there is to be still another observatory and this time again in Hongkong. On the north-west corner of the plateau on which the Regional Seminary for South China is built, overlooking the fishing village of Aberdeen, there is a massive ferro-concrete structure, some fifteen feet high, pointing due north and south.

It is destined to form the base of a telescope which when first made was the biggest in the world. The instrument is a Refractor with a very interesting history, a history not altogether unconnected with Hongkong. It came from Markree Observatory, Co. Sligo, in the north-west of Ireland.

From the year 1874 to 1883 the Director of Markree Observatory was Dr. W. Dobereck, who in the beginning of the following year became the first Director of the Hongkong Observatory, which had just been established.

ITS HISTORY
In 1824 Fraunhofer constructed an achromatic glass of 9 inch diameter which held the world's record for size until Cauchy's of Paris made one of 12.4 inch. This was bought by Sir James South and later bequeathed by him to Trinity College, Dublin for the Dunsink Observatory, where it is still the objective of the principal telescope.

In 1831 Cauchy finished an objective of 13.4 inch diam. which was very highly praised by Arago, Gumbart and other Parisian astronomers of the time.

Mr. Edward Joshua Cooper, at the time a young man of 33 and a very keen astronomer, happened to be in Paris. He purchased the Objective, brought it back to Ireland, and mounted it provisionally on a wooden structure at Markree Castle. Arago had advised the French Government

to buy it, but Mr. Cooper was before them in the field. Reports that in a remote corner of Ireland was to be found the world's greatest telescope, erected by one who was then unknown in scientific circles, brought a number of enquiries. Dr. Robinson, Director of the Armagh Observatory, paid a visit to Mr. Cooper, and the friendship begun by that visit was responsible in a very marked way for the position which Markree was to hold for many years in the field of Astronomy. Dr. Robinson was intimately acquainted with the principles of practical astronomy, and was of the greatest help to Mr. Cooper.

The idea at first was to study double stars, but it was soon found that the mounting was too crude, so this study had to be temporarily abandoned. But even then, imperfectly adjusted as it was, the instrument was so good that Dr. Robinson said of it: "I have been no little amused at the insignificant appearance in my 10 inch Reflector of some of the objects which were so very striking at Markree." Sir John Herschel held that his 25 inch Reflector was more powerful, but admitted the marked superiority of definition in the Markree Refractor.

THE MOUNTING OF THE TELESCOPE
Obviously, if results commensurate with the excellence of the telescope were to be achieved, the first thing to be done was to have the instrument properly mounted. There was a young clerk in a Dublin office with whom Dr. Robinson discussed the question. This was Mr. T. Grubb, who afterwards was to become famous as the maker of astronomical instruments. The young man soon satisfied Dr. Robinson as to his ability to mount a large equatorial, should the opportunity offer. The opportunity came quickly, for Mr. Cooper, though not without some misgiving as to the result, acted upon the advice of his friend and ordered an equatorial mounting from Grubb.

In December, 1832, the declination axis and circles were finished, and the polar axis was being cast. The maker certainly did not fail to secure stability, the mounting, in Dr. Robinson's opinion, "having an appearance of strength that seems to set unsteadiness at defiance." It was erected in 1834 on a foundation of limestone blocks. This same mounting is now in Hongkong as good and strong as when it was first put together.

As soon as it was erected the work of cataloguing the stars was begun, and during the years 1848-1856 some 60,000 stars within three degrees of the Equator, down to those of the twelfth magnitude, were catalogued, the results being published in four volumes in Dublin at the expense of the Government.

In 1841 Mr. Cooper purchased another equatorial instrument of 3½ inch aperture. It was beautifully mounted and with it the planet Mercurius was discovered in 1846.

From 1863, the year of Mr. Cooper's death, until 1874, the Observatory was not used. In the latter year Dr. W. Dobereck was appointed Director

and remained there until he took up the post of Director in Hongkong. Observations were continued by other Directors until 1902. The instruments were bought by the Irish Jesuits in the summer of 1835 and arrived in Hongkong in November.

ITS FUTURE USE

Some figures with regard to the size of the large telescope may be of interest. The Objective is 13.4 inches in diameter which makes it the second biggest Refractor and the third biggest telescope in China. The tube is 25 feet long and weighs 8 cwt. The mounting alone weighs 2 tons. Attached to the great equatorial is a finder telescope of 5 inch aperture.

A glance at the photographs will give some idea of its size. These were taken during the month of May this year, when the telescope was prepared for testing. The tube was later taken down as there was no house around it, and the danger to it through rain and high winds, to say nothing of typhoons, was too great to leave it in position.

The primary object of the observatory in the Regional Seminary is to aid in the complete training of the students for the priesthood. The course for the priesthood in the Catholic Church is a lengthy and a thorough one. It is divided into what may be called a remote and proximate preparation. The remote preparation takes place in the minor seminaries which are to be found in every vicariate of China. The proximate studies are completed in the Regional Seminaries of which there are twelve in China. The course in these seminaries is divided into two sections. The first three years are devoted to the study of Philosophy and Science, which cover a great number of subjects, including Logic, Ethics, Psychology, Cosmology, Physics, Chemistry, Biology, Astronomy. The subsequent four years are devoted to those subjects which are essentially the subjects of the priesthood. Everything that can be done to make these studies more perfect is done, and in the study of astronomy the observatory will help materially.

It is to be noted that the Regional Seminaries are for native clergy, and that their function is to train Chinese Priests fully equipped to meet the demands which the world of to-day puts upon them.

Greater Range For
Ultra-Short Waves

The most important discovery in wireless research for many years has been made by the Government's Radio Research Board under the Department of Scientific and Industrial Research.

It is that ultra-short waves, those used in television, are capable of reflection in the lower layers of the atmosphere. This suggests that the possible range of television transmissions may, in due course, be very greatly extended.

Hitherto it has been believed that such waves, the only vehicle for high-quality television, other than excessively expensive land cables, were substantially limited to direct travel in the manner of a searchlight beam.

For this reason a radius of 50 miles has been generally accepted as a rough limit for the effective reception of ultra-short waves, even when the transmitter is favourably situated, as at the Alexandra Palace.

Now it appears that, given sufficiently powerful transmitters—and these must surely come—there is no theoretical limit to the distance to which ultra-short waves may be made to reach. Even inter-continental transmissions may in time become possible.

More immediately, the idea that an extensive net work of television transmitters is an inevitable preliminary to the provision of a national service may require revision.

MARCONI'S OPTIMISM

The new discovery is a triumph for the obstinate optimism of the Marconis. More than three years ago he said:

"So far as extending the range of these waves is concerned, I cannot forget that at the very time when I was sending and receiving waves, 3,000 miles across the Atlantic Ocean in 1901, distinguished mathematicians were warning against which proved that such communication would be limited to a distance of about 160 miles.

"We must try everything," the Marconis added, "whether it seems

possible or impossible," and in this belief he clung firmly to his opinion that ultra-short waves might be reflected by some still undiscovered layer in the atmosphere.

Some years ago, the Marconis succeeded in transmitting even shorter waves to a distance of 160 miles—about 100 miles further than the limit of "direct" reception under the conditions of the test.

This discrepancy was attributed to a slight bending of the waves round the curvature of the earth, and it is known that light waves can be slightly bent. But it was generally considered that the strength of reception must fall off very sharply once the limit of direct reception was passed.

Scientifically, the new discovery is that of an additional radio-reflecting layer in the atmosphere. The Heaviside layer, predicted in 1902, was discovered by Professor E. V. Appleton in 1924. It is normally at a height of 55-70 miles.

"NEW" REFLECTING LAYERS

The discovery of the "Appleton layer," which varies in height between 120 and several hundred miles, was announced by Professor Appleton in 1927. This is the layer which makes long-distance transmissions possible on short waves—the B.B.C.'s Empire services included.

At the same time, Professor Appleton reported the existence of an absorbing region, lower than the Heaviside layer, from which the "medium" waves he was using were occasionally, but not very often, reflected. This was the only hint of a lower reflecting layer, and it was not suspected that ultra-short waves might be reflected.

The Radio Research Board has now discovered what appears to be a series of extra reflecting layers varying in height between 4 and 17 miles. Wavelengths as short as the 7 metres of the coming television transmissions have, according to "Nature," been reflected.

All records have been made by the radio department of the National Physical Laboratory under Mr. R. A. Watson Watt. Similar records have been made in America by Professor R. C. Colwell, University of West Virginia.

For the future, it would appear that the two great needs are for research on the production of higher-powered ultra-short wave transmitters; and for the fullest possible investigation of the conditions under which ultra-short waves are reflected, the extent to which their strength is reduced in the process, and of the clearness or otherwise of the reflected signals.

HUMAN SACRIFICE IN MEDICINE

ARMY OFFICER AND
TWO PRIVATES

The story of how an American officer, once saluted two American Army privates was told by Sir Malcolm Watson recently, when he delivered the tenth Stephen Paget Memorial lecture before the annual general meeting of the Research Defence Society at the London School of Hygiene and Tropical Medicine.

The officer was Surgeon-General Walter Reed, discoverer of the cause of yellow fever, and the men two privates who had volunteered to allow themselves to be bitten by infected mosquitoes, and for their service had refused all payment.

All that one of them would say, Sir Malcolm recalled, was, "We are doing this solely in the interests of human life and the cause of science."

"Major Walter Reed," so Sir Malcolm concluded the story, "touched his cap, saying respectfully, 'Gentlemen, I salute you.'"

"At no time in the history of research," he continued, "have there been a lack of volunteers when men were required to risk or sacrifice their own lives for the benefit of their fellow-creatures."

Early in the work of the investigating board, he proceeded, one of the medical men concerned died of yellow fever contracted from a mosquito which he deliberately watched biting him in a yellow fever ward.

Then a colleague was deliberately infected. He suffered from a severe attack of the fever, which left his heart permanently weakened and led to his early death.

THE REWARD

In another series of experiments, also with army volunteers, men underwent what then appeared an equally great risk. They were required to sleep on the soiled and dirty mattresses of former yellow fever patients, and even to wear the pyjamas in which yellow fever victims had died.

The reward of these "human sacrifices" to medicine, and those who risked their lives in the Panama Canal and the virtual elimination of yellow fever from the civilised regions of Central America.

"I would leave you," Sir Malcolm concluded, "with the thought of three men, Manson, Ross and Reed, exiled in the heat and dust of far-off lands; with calm and steadfast minds in the face of the terrors of cholera, yellow fever and other deadly plagues; often laughed at and sneered at; sometimes insulted and reviled; even obstructed, not only by the ignorant but by the common man; in high places, not only in the hand nor to the left; doing the work to which they felt the Master had called them."

NOVEL METHOD OF USING GIANT TRACTORS

EXPLORING ANTARCTIC
PLANNED BY HAROLD
JUNE

New York July 1.

Harold June, veteran of two of Admiral Richard E. Byrd's expeditions to the South Pole, is planning a novel method of exploring the Antarctic, involving the use of giant tractors capable of carrying a small airplane.

The June expedition, which is still in its earliest stages of preparation, plans to make its base at Marthaland, directly across the Pole from Little America and the last place in the world man has never visited.

In announcing the expedition, an associate of June's said three tractors to be used would be of the caterpillar type, Diesel powered, and with a cruising range of over 1,500 miles.

Each tractor will carry, in addition to an estimated crew of from eight to twelve men, a small scouting plane of the cabin type with room for four men.

The three tractors will start from their base at Marthaland separately, at an angle of about 45 degrees from each other, and their farthest point from the base will be separated by a distance of perhaps 200 miles. At stated intervals the planes will take off from the snow and establish communication with each other. Constant communication will also be maintained by short wave radio.

While plans for the expedition have not progressed past the paper stage, a member of the prospective expedition announced that \$450,000 has been raised from "philanthropists and by public subscription." The same source also stated that June estimated a total of \$1,000,000 would be necessary.

It is expected two years will be necessary to complete arrangements for the expedition, and that the party will remain two years in the Antarctic. Plans have been drawn up for construction of the tractors and the plans, and June is searching for a ship to take his party south.

The expedition will have a total crew of 100 men, only 80 of whom will remain on the ice, the others returning with the ship to her base, possibly at Dunedin, New Zealand.

The territory to be covered is approximately 600,000 square miles; June plans to make maps and conduct geological surveys. He also hopes to discover coal.—United Press.

1ST \$15. 2ND \$10. 3RD \$5.

SECTION SIX
FOR THE BEST "NEWS HAPPENING" PICTURE

1ST SILVER CUP DONATED BY DR. F. BUNJE 2ND \$20

RULES:—

- The following Rules will govern the competition:—
- The Competition is confined exclusively to amateur photographers.
- Pictures submitted in Sepia tones should be accompanied by a smaller print in black and white.
- The Prizes will be awarded to the competitors sending in what are adjudged to be the best photographs in each Section. Each entry must be accompanied by a form which will be published daily during the period of the Competition.
- The right to publish any or all of the entries in the Telegraph is reserved.
- Photographs which have been already entered in local competitions are ineligible.
- At the conclusion of the Competition, entries will be returned to competition on application at this Office within seven days.
- No responsibility will be accepted for non-delivery, loss or damage.
- Photographs must not be less than Post-card size (excepting in the Children's Section) and the entry form should be lightly pasted on the back.
- No correspondence will be entered into in connection with the Competition.
- Entries in the Children's Section must bear the name, age and address on the entry form countersigned by a parent.
- No employee or member of any firm in the photographic trade is permitted to compete.
- Members of the Staffs of the Hongkong Telegraph and the South China Morning Post are not permitted to compete.
- The decision of the Judges shall be final.

MAGNA CARTA FOR RUSSIANS

ARBITRARY ARREST TO CEASE

Moscow, July 1.

Religious liberty, freedom of speech, and the right to public expression of political opinion, freedom of the Press, free education, security of employment with equal pay for both sexes and paid holidays, with State provision for unemployment, sickness, and old age.

These are some of the civic rights granted to Soviet citizens under the new Constitution, the text of which has now been made public.

In addition, new laws guarantee the freedom of the individual from arbitrary arrest, inviolability of the home, and secrecy of correspondence. All citizens, regardless of race, are granted equal rights of citizenship, and any attempt at restriction is punishable by law.

Arrests without the sanction of the civil authorities will be forbidden and the right of search in private dwellings denied to all except legally constituted authorities possessing a warrant.

Asylum is to be granted to all foreign leaders persecuted by their home Government.

7-HOUR DAY FOR WORKERS

New provisions for the improvement of industrial conditions and protection of the workers are contained in the Constitution, which lays down that "citizens of the U.S.S.R. have the right to work and to receive payment for their work in accordance with its quantity and quality, and have also the right to rest."

The right to work is guaranteed "as a result of the planned Socialist economy," and is made obligatory for every citizen, with wages to be adjusted according to the importance of the job.

To ensure the right to rest the working day is to be reduced to one of seven hours, with annual holidays with pay. Women are to have equal rights with men, the state is to protect the interests of mothers and children by the institution of an extensive system of maternity homes, crèches, and kindergartens.

A wide development of social insurance for workers and employers is promised at the expense of the State, with free medical aid and the provision of an extensive network of health resorts.

LIBERTY OF PRESS AND SPEECH

Together with liberty of the Press, freedom of speech is provided for under the new Constitution, and street assemblies, processions and demonstrations are to be permitted as being the rights of citizens. These rights are to be ensured "by the placing at the disposal of the toilers and their organisations, printing presses, supplies of paper, public buildings, means of communication, and other material conditions necessary for their realisation."

Article 124 of the Constitution states that "to ensure to all citizens freedom of conscience the Church in the U.S.S.R. is separated from the State and the school from the Church. The freedom of practice of religious observances and the freedom of anti-religious propaganda is recognised for all citizens."

MILITARY SERVICE

Universal military service in the Workers' and Peasants' Red Army is described in the Constitution as the honourable duty of all citizens and is enforced by law. Warning is given that "treason to the Fatherland, the violation of oaths, impairing the military might of the State, and espionage for a foreign State, are punishable with the full severity of the law as the most heinous crime."

Under the new Constitution, the supreme legislative body will consist of two Chambers.

The Constitution also provides for the election of a President of the whole of the Soviet Union. The election of the President, as well as of the two Chambers, will be direct by secret ballot.

Parliament is elected for a four-year tenure, but in the event of failure to reach agreement as to given legislation, a new election will be held.

Although the Communist Party remains the only legal party, all citizens over 18, regardless of their social origins, religious belief, former employment, or race, will be granted the franchise and the right to stand for election.

Peasants will have equal votes with city workers. At present every city vote is equal to five peasant votes in electing national delegates, of whom there have been one for every 25,000 workers and one for every 125,000 peasants.

Judges, as well as legislative and administrative public servants, will be chosen by popular vote.—Reuter.

don't let Film spoil the beauty of your smile

KEEP TEETH WHITE AND BRIGHT WITH PEPSODENT

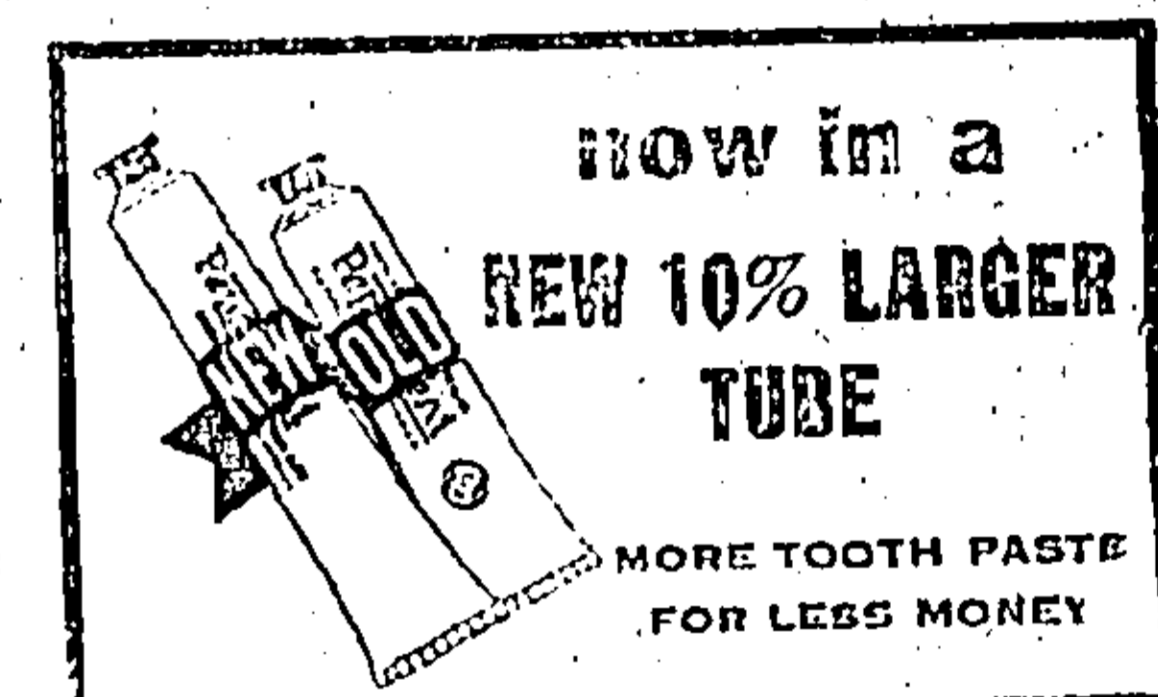

If your teeth are to be white and glistening, your smile alluring, you must remove film from teeth. For film dulls and discolors them, obscures their natural beauty. And the safest . . . most effective way to remove film from teeth is with Pepsodent Tooth Paste.

Try Pepsodent Tooth Paste today. Note how clean your teeth feel . . . how much brighter they look . . . after only one brushing. Then use Pepsodent regularly twice a day.

Pepsodent is a special film-removing tooth paste. It contains a cleansing and polishing material unexcelled in keeping teeth free from that gummy, sticky substance called film. Yet it does this safely. For Pepsodent contains no grit, nothing that might injure or harm tooth enamel.

OLYMPIC TRACK AND FIELD EVENTS

FINAL TRY-OUTS IN U.S.

New York, July 10. Final Olympic tryouts in all but three track and field events were scheduled to start to-day on Randall's Island. The meet will continue to-morrow. The 50,000 metre walk was held on May 21 at Cincinnati. The marathon was decided at Washington on May 30, and the decathlon final was held at Milwaukee nearly two weeks ago. Sixty-eight athletes will be selected at the meet here. —United Press.

LEADING RACKET WIELDERS

"D" DIV. TENNIS

One Surprise Only NEW RADIO COUPLE

South China Athletic Association dropped an extremely valuable point in the "D" Division of the tennis league yesterday and to all intents and purposes the only challengers to Craigengower for the championship are Radio Sports Club.

Craigengower were not engaged yesterday, but Radio had an easy task against Kowloon Cricket Club, dropping but two sets. D. Leonard and Au Kien-moon made an impressive partnership for the winners, annexing three sets without difficulty.

K.C.C. included Willie Hyde, who until recent seasons played for the "A" team, but who has since given up tennis for lawn bowls. Hyde partnered Frank Goodwin and they managed to win one set, beating the strong Chanson-Hassan combination, and running G. Singh and Karnail Singh to ten games.

Army Tennis Club were responsible for upsetting South China's record, the military team, containing some new players, sharing the spoils. This was the big surprise of the day as A.T.C. were occupying bottom place in the table.

The sets were fiercely contested, one being drawn, two going to 7-5 and two to 6-4. The Army were good value for their point.

Police had a nice win against Kowloon Indians, while I.R.C. were but slightly extended by Central British Association.

Generally speaking the results were in accordance with form.

LEAGUE TABLE

	W.	L.	D.	Pts.
C.C.C.	6	0	0	36
S.C.A.A.	5	4	1	35
R.S.C.	5	4	0	31
P.R.C.	5	3	0	24
I.R.C.	5	3	0	23
C.H.A.	5	0	1	22
A.T.C.	5	1	3	20

K.C.C.	6	1	0	19

BERLIN OLYMPIAD

Money Voted For French Representation

Paris, July 9. Although not participating officially in the Olympic Games in Berlin, the French Government has voted a credit of 1,000,000 francs to enable the French Olympic Committee to be represented at the games. —Reuter Bulletin Service.

U.S. OLYMPIC WOMEN'S SWIMMING TEAM

WILL BE CHOSEN AFTER TO-DAY'S TRIALS

New York, July 11. Final tryouts are scheduled for to-day to determine the personnel of the American Olympic women's swimming team. The competition will continue through to-morrow. Eighteen will be selected for the team. —United Press.

LEAGUE TENNIS

RESULTS IN DETAIL

THREE DECISIVE VICTORIES

A full programme of four matches was played in the "D" Division of the Tennis League yesterday. Three resulted in fairly decisive victories but one, between the Army T.C. and the South China A.A., played at Soekunpo, ended in a draw.

The Indian R.C. beat the Central British Association by 5-4-3-2 at Soekunpo, the Radio Sports Club beat the Kowloon C.C. at King's Park, and the Police R.C. had the better of the Kowloon Indians at Happy Valley.

Scores:

INDIAN R.C. v. C.B.A.

At Soekunpo, the Indian R.C. beat the Central British Association by 5-4-3-2. Scores:

M. Hassan and S. M. Ramjahn (I.R.C.) beat W. Stoker and G. Gurevitch 6-4; lost to S. Fowler and M. Yatskin 4-6; beat J. Clayton and D. Smith 6-2.

T. Ali and A. M. Ramjahn (I.R.C.) beat Stoker and Gurevitch 6-1; beat Fowler and Yatskin 6-1; lost to Clayton and Smith 5-7.

M. I. Tsang and A. K. Min (I.R.C.) beat Stoker and Gurevitch 6-0; beat Fowler and Yatskin 7-5; lost to Clayton and Smith 2-6.

ARMY T.C. v. SOUTH CHINA

On their own courts, the Army T.C. drew with the South China A.A. Scores:

H. W. Kingdon and B. Peckham (A.T.C.) drew with C. H. Wong and T. K. Tsang 6-6; lost to Y. L. Kwan and J. Mok 2-6; beat C. M. Tsang and P. W. Tsang 7-5.

G. Brimmer and L. Worsfold (A.T.C.) beat Wong and Tsang 6-4; lost to Kwan and Mok 3-6; beat Tsang and Tsang 6-3.

J. Imrie and W. Lawrence (A.T.C.) lost to Wong and Tsang 5-7; lost to Kwan and Mok 4-6; beat Tsang and Tsang 6-3.

POLICE v. KOWLOON INDIANS

At Happy Valley, the Police R.C. defeated the Kowloon Indian T.C. by 5-4-3-2. Scores:

Major and Calthrop (Police) lost to A. Khan and G. M. Khan 3-6; beat M. Ramjahn and M. Singh 6-0; beat Jahn Dad and A. H. Azan 6-1.

Smith and Baker (Police) beat Khan and Khan 6-3; lost to Ramjahn and Singh 4-6; lost to Dad and Azan 4-6.

Carruthers and Pitt (Police) beat Khan and Khan 6-3; beat Ramjahn and Singh 4-6.

(Continued on Page 13.)

HELEN JACOBS ON TENNIS

Valuable Tips On Game

The new woman champion recently gave the *Sunday Chronicle* these useful hints to lawn tennis players.

The most important of tennis rule is to watch the ball. But even so, few players watch the ball on their racket strings.

They are inclined to look at the ball until just before they hit it, then look up at their opponent or at the place where they intend to hit the ball.

The best way to assure watching the ball is to keep your eye on it as it bounces in your opponent's court, as he hits it, as it comes, and as you strike it.

Watch the ball so carefully that you can detect the direction of the spin.

It is not necessary to lose sight of the opponent while watching the ball. You cannot possibly avoid seeing him if you hit the ball approximately a foot in front of you, for in that case you will find him in your line of vision.

When you hit an overhead (either serve or smash) it is especially important to watch the ball on your racket strings as it is more difficult to gauge a ball dropping from a height above your head than to gauge a ball that is following a line approximately horizontal with the court.

FOUR REASONS WHY

Hit the ball in front of you. This rule is important for the following reasons:

1. Your swing reaches the maximum force at this position.

2. You are more apt to hit the ball squarely at this position because as your racket progresses from the backswing to its impact with the ball it reaches a position more nearly perpendicular to the ground when it is approximately a foot in front of you.

3. Your body-weight is more evenly distributed than it is if you hit the ball at your side or too far in front of you.

4. Hitting the ball a foot in front of you, you can watch the ball and keep the net in view at the same time.

Keep your wrist stiff. If you observe this rule it will make a great difference in the firmness and accuracy of your shots.

You must realize that a certain amount of vibration when you hit the ball. This in turn reduces the power of your shot and tends to detract from the accuracy of the ball's flight.

You must try to make the racket a continuation of your arm from the elbow down.

THE FOLLOW-THROUGH

There are some misconceptions about the follow-through. One of the most common is that the racket must describe an arc round the neck through.

The perfect follow-through is produced if the racket follows after the ball, i.e. in the direction the ball has taken.

That you want to do is to execute a square hit, therefore the face of the racket must travel as far as possible with the ball which remains a fraction of a second on the strings.

If you follow through as if you were throwing the racket after the ball you will achieve the required result.

If you bring your racket back on a straight line from this follow-through you will have the correct position for the beginning of the shot.

Your shoulder, as you hit the ball, should indicate the direction of the shot.

This is not necessarily a give-away to the opponent, for as your shoulder comes round with the racket arm the opponent's eyes are on the ball you are about to hit.

English Balls For Tests In Australia

Melbourne. The Australian Board of Control has agreed to the use of English-made cricket balls in the forthcoming Test matches between England and Australia, but the Board has asked the M.C.C. to approve the use of Australian-made balls in all other matches during the tour.

It is recalled that during the tour of 1928-29, Mr. A. P. F. Chapman would not agree to the use of Australian balls in the match against Victoria.

The Board of Control has also asked for a change in the rules regarding the covering of wickets for all games other than Tests.

Previously a covering for foothold for batsmen and bowlers has been provided, but the Board has now recommended that once the match has started, the wicket shall be entirely protected from rain, and shall be covered wholly from the end of each day's play until 7 a.m. on the following day, when it shall be removed if the weather is fine.

This is the practice adopted in Sheffield Shield games.

MAY TURN BOXER

Clark Gable, film star, who, it is reported may be induced to become a professional boxer. "He packs a blow like dynamite" says an observer.

CLARK GABLE MAY FIGHT BAER

For £10,000 Purse

Clark Gable has received a "bona fide offer" of a \$50,000 dollar (£10,000) purse to meet Max Baer, film actor and ex-heavyweight champion of the world, according to the New York Evening Telegram.

The offer has been made by Tom Gallery, a boxing promoter, who is willing to leave the choice of date and venue to Gable.

The latter has replied to the promoter that he will not be able to consider the matter until he has obtained leave of absence from the studio. He has, however, applied to the State Athletic Commission for a boxing licence.

Gable is credited with possessing a punch "like a ton of dynamite."

A few days ago he knocked out Allen Pomeroy, a former inter-collegiate heavyweight champion, during rehearsals at Hollywood for a new picture, "Can and Mabel," in which Gable portrays a prize-fighter.

When he came to, Pomeroy said "His punch is like a ton of dynamite."

He added: "I would like him to train for a professional ring career."

When Von Cramm went on to the court, it was clear that he would be no equal for Perry, who was in excellent form and was given what to all intents and purposes was a walk-over. The German ace's form was a mere shadow of the displays he had given in the earlier rounds of the tournament.

GERMANY ANGRY

A subsequent Transocean-Kuo Min message from Berlin revealed that strong feeling has been aroused in Germany by the failure of the British news agencies to record the accident which befell Von Cramm while it was being stressed that Perry won without effort.

The sports editor of Berliner Tagblatt states: "If the necessary quality of sports is fair play, then it should be exercised also by the news agencies. We do not question England's superiority in the field of tennis but we must record a representation of a match which betrays intentional ill will. It is with the utmost regret that we have to draw attention to this fact as well as the very name of England the idea of fair play is and always has been connected."

Derbyshire were exceedingly unlucky. After hitting up 335 for 8 declared, they dismissed Hampshire for 98 and obtained two of the second innings wickets for ten runs. But rain came to bring the game to an abrupt finish and to rob Derby of well deserved points.

At Lord's, Eton and Harrow met in their annual match, Harrow utilising what hours of play there were to score 161 for six wickets. Watson contributed a useful 67 not out.

COUNTY CHAMPIONSHIP

Leicester (330) beat Surrey (116 and 121) on first innings

Lancashire (225) drew with Sussex (257/4) at Hove.

Derbyshire (336/8 dec.) beat Hampshire (88 and 102) on first innings

Kent (375) drew with Glamorgan (40/1) at Folkestone

Gloucester (57/5) beat Yorkshire (56) on first innings

Northants (130/4) beat Notts (100) on first innings

OTHER MATCHES

Harrow, at close of play had scored 161 for 6 against Eton

VON CRAMM SUSTAINS SHOCK

JUST BEFORE HIS WIMBLEDON FINAL

CAR INCIDENT

How Von Cramm, the German finalist in the Wimbledon singles was robbed of his title hopes through being involved in a motor accident while on his way to the courts to meet Fred Perry, the British holder, is revealed by Transocean-Kuo Min, the German news agency.

Hongkong was astonished when the news reached here that the German ace had won only two games in the three straight sets by which Perry retained his crown, for although odds appeared to be even on either side, it was recalled that when the same two players met previously in the Paris Championships on June 1, the British champion was defeated after a five sets battle.

It is now shown that when he entered the courts to meet Perry, the German player was suffering from severe shock and a slight knee injury, received in a motor crash while he, his wife and two friends were driving to the match.

VER NARROW ESCAPE

It is now shown that when he entered the courts to meet Perry, the German player was suffering from severe shock and a slight knee injury, received in a motor crash while he, his wife and two friends were driving to the match.

All four had a narrow escape. It was only Von Cramm's presence of mind that prevented a collision with another car, which according to Transocean-Kuo Min's London Correspondent, was being driven at a reckless speed.

The German star was at the wheel himself and only by jamming on the brakes was he able to avoid the crash. Von Cramm was pitched violently forward and sustained a slight knee injury, but even more serious in its consequences was the shock he received. So dramatic was the incident that Frau Von Cramm suffered a nervous breakdown, while the other two passengers were also severely shaken by their adventure.

When Von Cramm went on to the court, it was clear that he would be no equal for Perry, who was in excellent form and was given what to all intents and purposes was a walk-over. The German ace's form was a mere shadow of the displays he had given in the earlier rounds of the tournament.

GERMANY ANGRY

A subsequent Transocean-Kuo Min message from Berlin revealed that strong feeling has been aroused in Germany by the failure of the British news agencies to record the accident which befell Von Cramm while it was being stressed that Perry won without effort.

The sports editor of Berliner Tagblatt states: "If the necessary quality of sports is fair play, then it should be exercised also by the news agencies. We do not question England's superiority in the field of tennis but we must record a representation of a match which betrays intentional ill will. It is with the utmost regret that we have to draw attention to this fact as well as the very name of England the idea of fair play is and always has been connected."

Derbyshire were exceedingly unlucky. After hitting up 335 for 8 declared, they dismissed Hampshire for 98 and obtained two of the second innings wickets for ten runs. But rain came to bring the game to an abrupt finish and to rob Derby of well deserved points.

At Lord's, Eton and Harrow met in their annual match, Harrow utilising what hours of play there were to score 161 for six wickets. Watson contributed a useful 67 not out.

Our Daily Golf Hint

In playing a short approach the ball should be hit smartly with rather rigid wrists. Don't ease up on the stroke or try to flick the ball with a laddling movement.

—James Barnes.

GERMANY IS TWO UP

In Davis Cup Match

HENKEL WINS

Zagreb, July 10. Germany to-day became virtual winners of the European Zone of the Davis Cup when they won the first two matches against Yugoslavia, and require but one of the remaining three to qualify for the inter-zone final.

Von Cramm, showing no signs of his injured thigh, which handicapped him at Wimbledon, played masterly tennis to dispose of P. Pallada in the first match of the tie.

It required four sets for Von Cramm to win, but he should have accomplished it in three. He actually led 6-1 in the third set after winning the first at 6-4, and the second at 6-2. Then he slacked off while Pallada played his best. The Yugoslavian pulled up and won the set in the 14th game. In the German returned refreshed in the fourth set and took it after eight games.

Henkel showed no mercy on Pancee when they met in the second singles of the day, obliterating the Yugoslavian in straight sets of 6-1, 6-2, 6-4.

Reuter.

In view of their commanding lead Germany will probably play Von Cramm and Henkel in the doubles in an effort to get an outright decision before the remaining singles are played. This would enable Von Cramm to stand down for his last singles should he be feeling the strain.

LAWN BOWLS

Draw For The Singles

NEXT WEEK'S MATCHES

Fourth round matches in the Open Singles Lawn Bowls Championship for next week were arranged last evening by the sub-committee who made the draw, at a meeting held in the Board Room of the South China Morning Post, Ltd.

The third round match between A. W. Grimmit and J. V. Ramsay, postponed from last Tuesday, has been re-arranged for next Tuesday on the Hongkong Football Club's green.

At the request of one of the rivals and with the consent of the opponents, the committee re-arranged the Open Singles match between the quartettes skipped by R. P. Phillips and R. Basa for the Civil Service C. C. Green, instead of the Kowloon Dock green. This match will most probably be played on Thursday.

The following is the draw for the fourth round of the Open Singles, and the dates on which the games are to be played:

SINGLES

(Fourth Round)

MONDAY, JULY 13
(Football Club Green)
A. E. Carter v. J. E. Knight
H. A. Alton v. G. S. Mitchell
(Kowloon C. C. Green)
J. Shepherd v. W. K. Way
A. M. Jones v. A. E. Carey
(Civil Service Green)
(Tai Koo C. C. Green)
A. Hyde Lay v. H. F. Boscoe
(Kowloon Dock Green)

SINGLES

(Third Round)

TUESDAY, JULY 14
A. W. Grimmit v. J. V. Ramsay

BROOKLANDS SOLD

£250,000 PAID FOR RACK TRACK

Brooklands, the famous race track, has been sold to Electric and General Industrial Trusts, for about £250,000.

A big programme of development has been prepared. In addition to public amenities extensions will be made to the airport and the factory means will be enlarged.

Brooklands was founded 30 years ago by the late Mr. H. F. Locking, pioneer of British motor-racing, to test British cars. It cost £150,000 to build the track alone.

A QUICK RECORD

The opening was in June, 1907. Before the month was out Mr. S. F. Edge, in his Napier, raised from 800 miles to 1,381 the world's motor-racing record for 24 hours' continuous running.

It was the scene of some early flying feats. In 1909 the French aviator, Paulhan, circled over the course until he had covered 96 miles.

His Excellency the Governor has appointed Mr. C. B. Burgess to be a Police Magistrate in addition to his other duties.

(Football Club Green)

SINGLES

(Fourth Round)

TUESDAY, JULY 14
A. M. Holland v. J. E. Norman
(Kowloon Dock Green)
A. B. Jones v. L. A. Gutierrez
(Civil Service Green)
THURSDAY, JULY 16
A. W. Grimmit v. C. H. Basa
(Football Club Green)
J. V. Ramsay v. C. H. Basa
(Kowloon Dock Green)
It was decided by the committee to call a general meeting of the Council of the Hongkong Lawn Bowls Association during the last week of July, for the appointment of the Inter-Port Lawn Bowls Selection Committee.

RACE PROGRAMME

September Meeting Of Macao Jockey Club

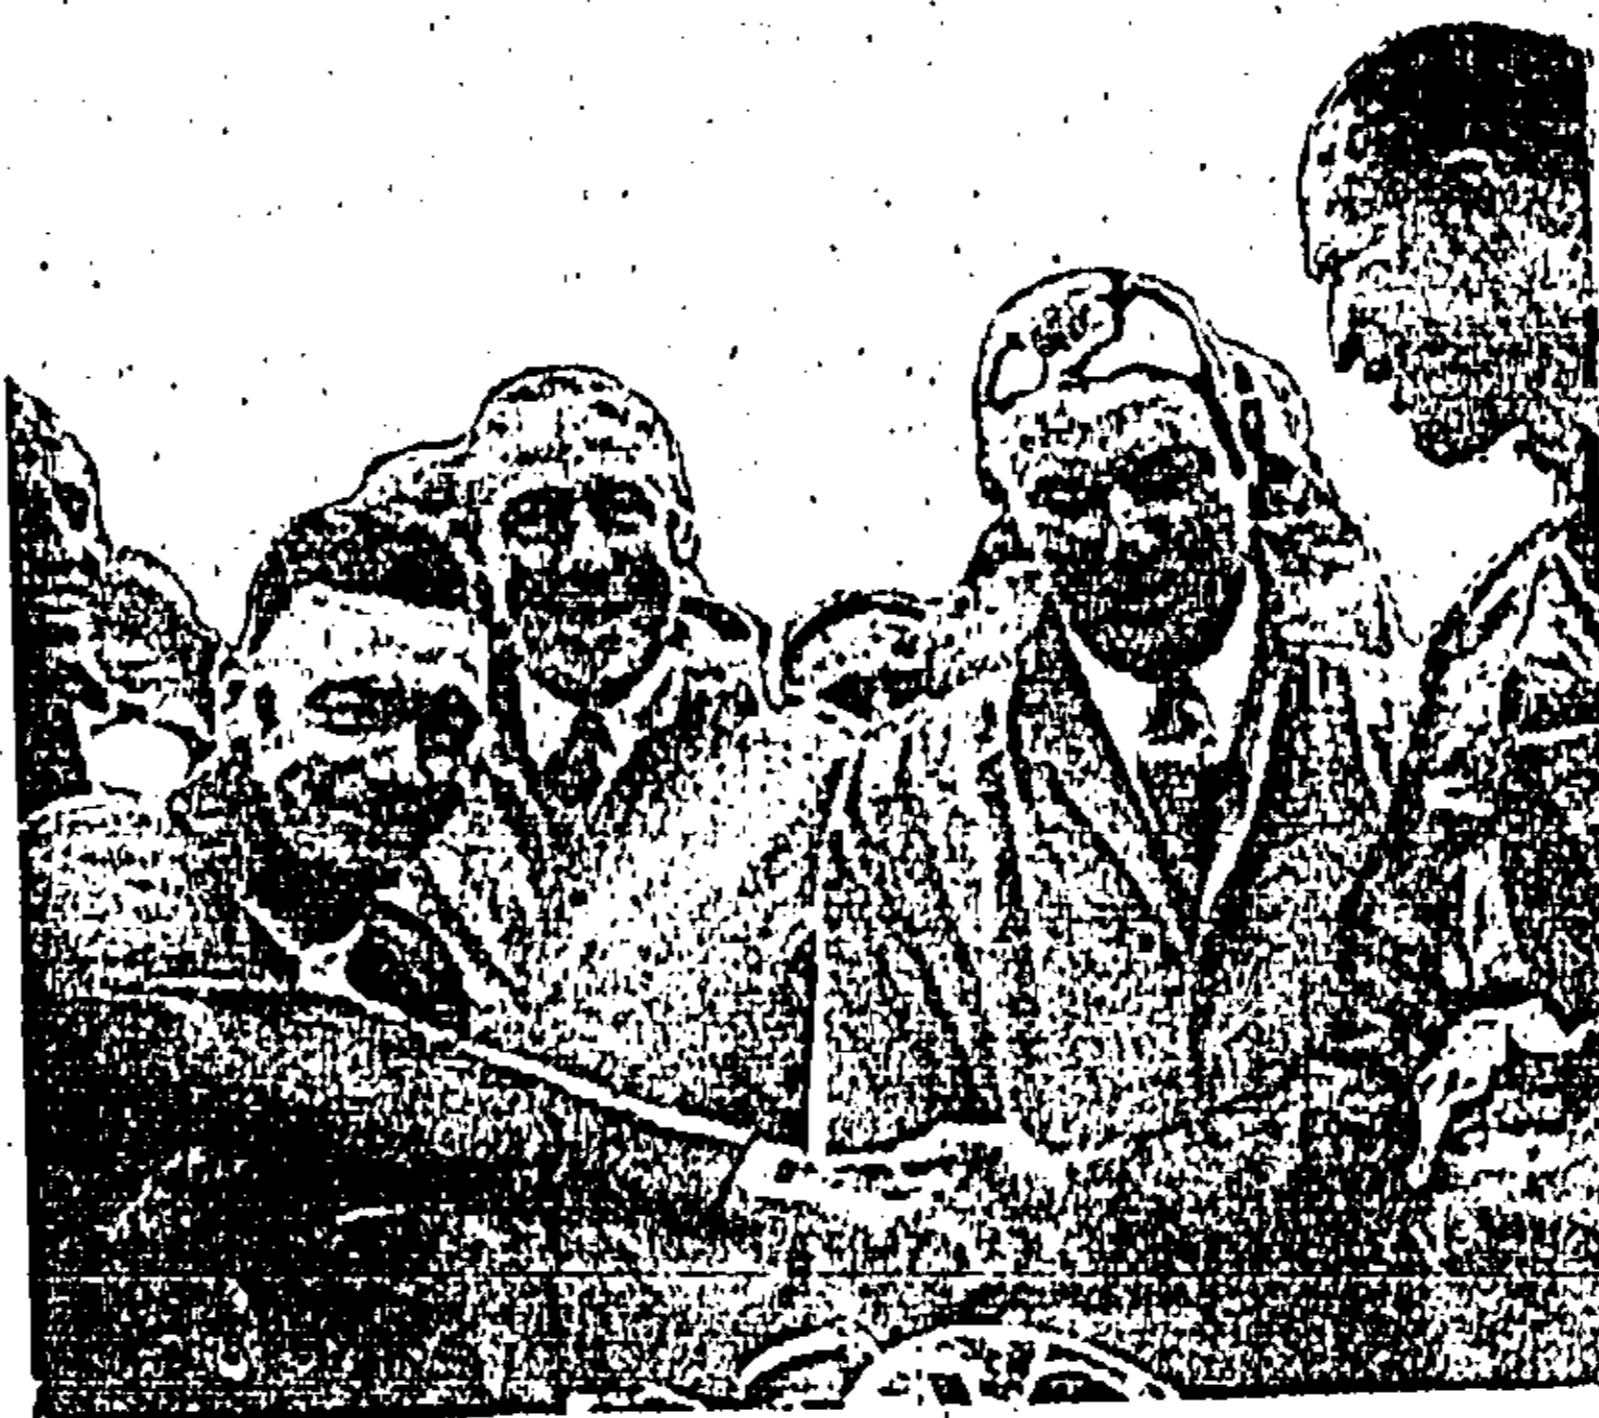

The following is the programme for the September Race Meeting of the Macao Jockey Club, on September 13:

1.—Toishan Handicap. (Second Section) For China Ponies classified by the Hongkong Jockey Club as "D" & "E" classes and Subscription Ponies of Macao Jockey Club. Jockey allowance. Six Furlongs.
2.—Tsin Shan Plate. For China Ponies. Subscription Ponies of this Club of 1936. Six Furlongs.
3.—Toishan Handicap. (First Section) For China Ponies classified by the Hongkong Jockey Club as "D" & "E" classes and Subscription Ponies of Macao Jockey Club. Jockey allowance. One Mile.
4.—Chung Shan Stakes. For China Ponies. Subscription Ponies of this Club of 1936. One Mile.
5.—Fat Shan Handicap. For China Ponies classified by the Hongkong Jockey Club as "C" class. Jockey allowance. One Mile.
6.—Pao Shan Handicap. For China Ponies. Subscription Ponies of this Club of 1936. One Mile.
7.—The Ladies Handicap Sprint (Unofficial). A cup will be presented to the winning rider. Souvenirs will also be presented to the 2nd & 3rd placed riders. For China Ponies, the Bona Fide property of the Hongkong and St. George's Riding Schools. To be ridden by members of the two Schools. No Whips or Spurs allowed. Half a mile.

N.B.: One entry will be made for Toishan Handicap. Entries will be divided into First and Second Sections at the discretion of the Handicapper. Entries close at 4 p.m. on Wednesday September 2.

His Excellency the Governor has appointed Mr. C. B. Burgess to be a Police Magistrate in addition to his other duties.

WON T.T. RACE AT 80 M.P.H.

F. L. Frith (left), winner of the Junior T. T. race in the Isle of Man, receiving the congratulations of E. A. Mellors, who was third. Frith's average was more than 80 m.p.h.—the fastest ever recorded for this race.

JUNIOR T.T. RACE SENSATION REINSTATEMENT FOLLOWS DISQUALIFICATION RACING THRILLS

London, June 16. There was a sensation last night when an appeal against the disqualification of J. Guthrie, leader of the Nortons in yesterday's Junior T.T. was allowed and the value of the second prize (£70) with the manufacturers' team prize awarded the entrant, Norton Motors, Ltd.

F. L. Frith (Norton), aged 26, of Grimsby, riding in his first T.T. as a professional, was the winner at the record average speed of 80.14 m.p.h. for the 264 miles.
J. H. White (Norton), with 77.97 m.p.h., was second, and E. A. Mellors (Velocette), 77.91 m.p.h., third.

BOMBSHELL FOR CROWD

Guthrie, who had set up records in previous days, was stopped in the sixth and disqualified after it was officially stated at the time—the Stewards had been informed that he asked a marshal to push him off, following chain trouble.

The news was a bombshell to the crowd. Guthrie made an official protest and explained that his request to the marshal was for a push off the bank, once on the road, he said, he got away by himself.

After a 2½-hour inquiry the Stewards stated that they had carefully sifted the official evidence and from the voluntary reports of independent witnesses, together with a personal inspection of the ground, they were of the opinion that they were originally misinformed. The official placings could not be disturbed, they said, but in the circumstances they recommended that the value of the second prize, which in all probability Guthrie would have won had he not been "flagged off," be granted to the entrant (Norton Motors Ltd.).

REGARDED AS FINISHER

"Guthrie will be regarded as a finisher and Messrs. Norton Motors Ltd. won the Manufacturers' Team Prize," concluded the statement.

When Stanley Woods the Dublin rider who has won more T.T.s than anyone else retired in the first lap, Guthrie, winner of last year's race, became favourite.

Records began to go by the board in the second lap. Frith, with 80.44 m.p.h. broke by several seconds the lap record.

Then Guthrie, by lapping at 80.63

CURTIS CUP NOT TO BE SHARED

Gt. Britain Declines Offer Made by America

London, June 15. Great Britain has declined the invitation of the United States Golf Association to share ownership of the Curtis Cup, following the halved international golf match between the women of the two countries at Glen Eagles. The following statement was issued by Miss M. MacFarlane, secretary of the Ladies Golf Union: "The United States Golf Association has cabled suggesting that, as the match was halved, the Curtis Cup should be held for one year by Great Britain and one year by the United States. The following reply is being sent by the L.G.U. to the U.S.G.A.: "The L.G.U. appreciate sincerely your most generous offer, but feel that as your team has not lost the match, the Curtis Cup must return to your country."

LEAGUE TENNIS DETAILS

(Continued from Page 12.)

and Singh 6-3; drew with Dad and Azan 6-6.

KOWLOON C.C. v. RADIO S.C.

Playing at home, the Kowloon Cricket Club lost to the Radio Sports Club by seven sets to two. D. Leonard and Au Kam-moon were the most successful pair for the winners, claiming all three sets. Scores:

F. Goodwin and W. Hyde (Kowloon C.C.) lost to W. J. Chanson and M. H. Hassan 3-6; beat G. Singh and Karmil Singh 6-4; lost to D. Leonard and Au Kam-moon 3-6.

A. E. Perry and H. W. Crabbe (Kowloon C.C.) beat Chanson and Hassan 6-3; lost to Singh and Singh 2-6; lost to Leonard and Au 2-6.

A. Spary and T. Ferguson (Kowloon C.C.) lost to Chanson and Hassan 3-6; lost to Singh and Singh 1-6; lost to Leonard and Au 2-6.

m.p.h., beat Frith's new record by four seconds.

Guthrie led at the end of the third lap with an average of 80.53 m.p.h.

GUTHRIE'S CHAIN OFF
Frith and Guthrie again broke the lap record—Frith at 81.01 m.p.h. and Guthrie at 81.4 m.p.h.

On the fifth lap Guthrie's chain came off, and Frith took the lead, with Thomas (Velocette) second and Guthrie third.

Frith kept the lead on the sixth lap, closely followed by Guthrie and Mellors; Thomas had dropped back to fifth behind J. S. White (Norton).

Guthrie had reached Ramsey when he was stopped and told of the Stewards' action.

E. R. Thomas (Velocette) was fourth with 70.8 m.p.h.; O. Steinbach (Germany) fifth, 75.63 m.p.h.; and H. Fleischmann (Germany) sixth, 75.53 m.p.h.

Sixteen riders of the 17 out of 24 who completed the race won first-class medals by finishing within nine-eighths of the winner's time.

The club team prize was won by Southport M.R.C., the only team to finish.

HOT WEATHER! DISTRESSING HEADACHES!

THE common headache, excessive heat, humidity, fatigue, and lowered powers of bodily resistance are everyday conditions you must watch during the summer months. 'ASPRO' won't remove the heat and humidity, but it will smash up most headaches in 5 to 10 minutes. Simply swallow two or three tablets with a drink of water and lie down for about 10 minutes, if you can. You don't run any risk of injurious after-effects when you take 'ASPRO' for headaches, because it does not contain narcotics or dangerous drugs.

'ASPRO' is the ideal medicine for heat and summer complaints. It will check a cold almost immediately, and there is nothing better than 'ASPRO' to combat the dreaded Dengue. Three tablets taken at once will help to reduce the temperature and settle the nerves. The function of 'ASPRO' is to give quick, safe service to men, women and children. It attacks the seat of the trouble, dispels the cause, because after ingestion in the system it is a solvent of Uric Acid, a powerful germicide, is antiseptic—anti-pyretic, anti-periodic, and anti-fermentative.

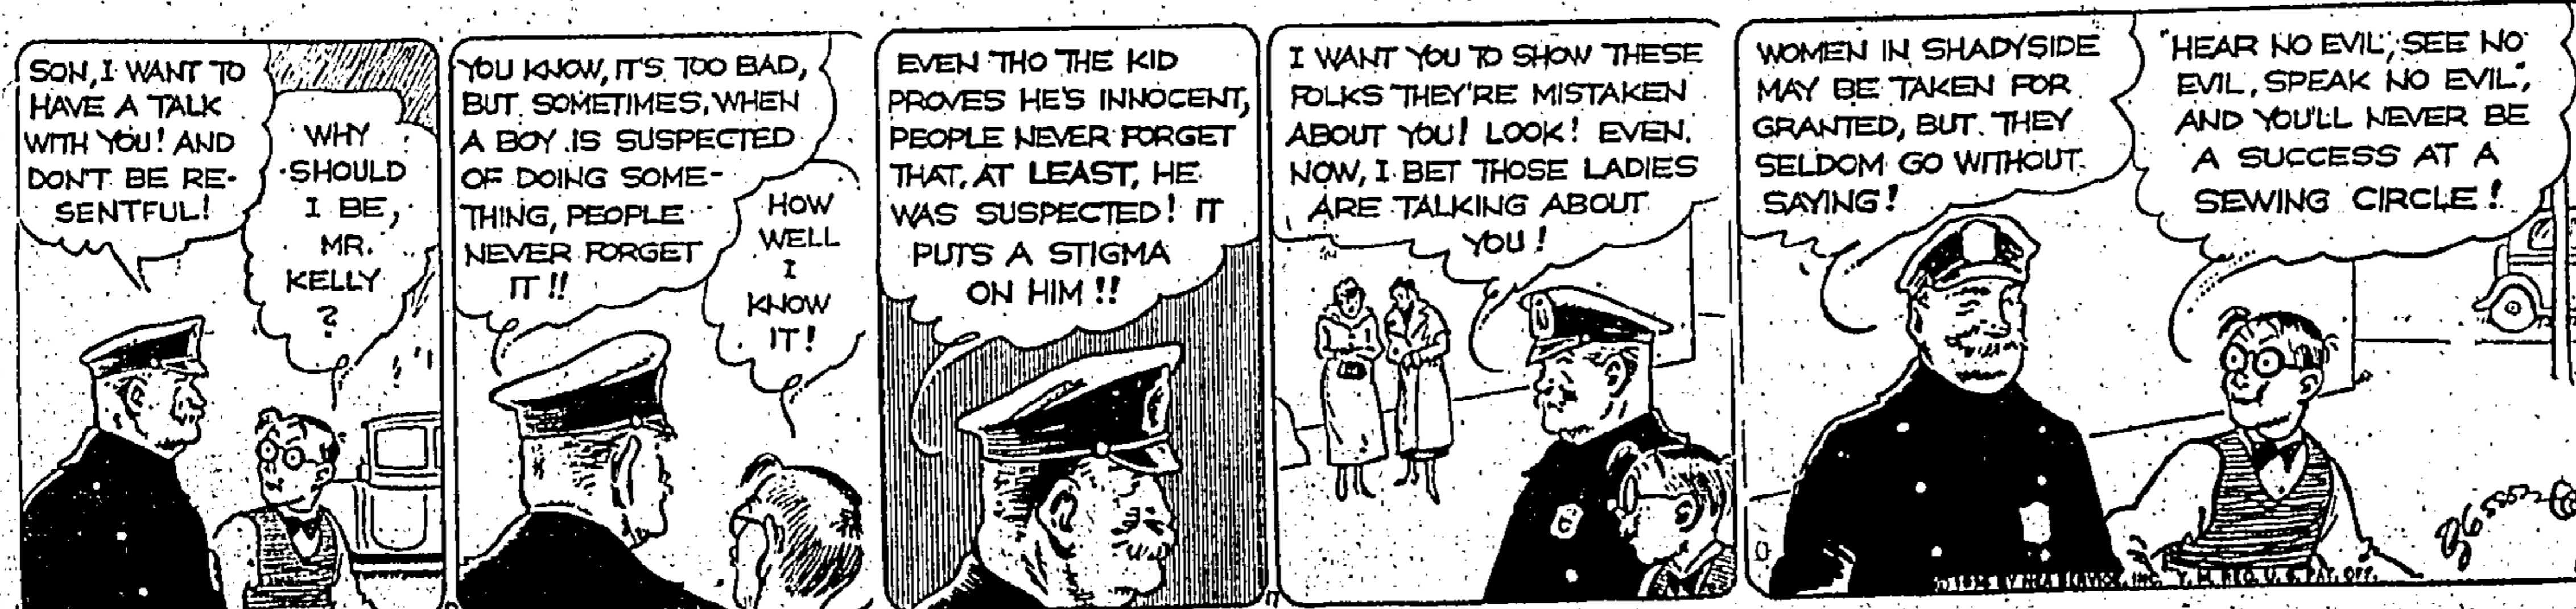

'ASPRO' RELIEVES INSTANTLY

BRITISH PILOTS COMPETE

ELIMINATIONS FOR KING'S CUP AMY MOLLISON FORCED OUT

London, July 10.

Loading British airmen piloted twenty-six machines in the elimination contest for the King's Cup air race to-day. The competitors are divided into three groups, according to engine power, and the qualifiers will pass into the final, which is being flown to-morrow on handicap terms.

To-day's race consisted of two circuits of 612 miles, the course starting and finishing at Hatfield and passing through Norwich, Nottingham, Bristol, Shoreham and Coventry.

Most of the competitors have experienced stormy weather, and those who have been forced to retire include Mrs. Mollison and W. L. Hope, who has won the Cup three times.

The fastest time was recorded by the Duke of Kent's New Gull, piloted by E. W. Percival, which averaged 171.75 miles an hour. In addition to this machine, the fourteen which qualified included Lord Wakefield's T.K.2, piloted by R. J. Wright; Lady Wakefield's Miles Hawk, piloted by Flight Lieut. Tommy Rowe; the Marquis of Londonderry's Percival Gull, piloted by Mr. Falk; and Mr. C.W.A. Scott's Miles Falcon, piloted by himself.—*Reuter*.

HIGH PRICES AT AUCTION

London, July 10.

The sale of the famous art collection of the late Mr. Henry Osherson began at Christie's to-day, when his drawings by old masters were put up for auction.

Leonardo da Vinci's drawing, entitled "Rider on Rearing Horse," which measures 5 1/4 inches by about 5 inches, fetched 4,100 guineas. Nine small sketches by Fra Bartolommeo were sold for just under £1,500. Seven pen and wash drawings by Antonio Canaletto attracted keen bidding and realised £2,165. One of them, called "Ascension Day at Venice," was secured for the British Museum at 800 guineas.—*British Wireless*.

OBSCENE MATTER IN POST

POWER TO DESTROY PACKAGES

The following additional regulation has been issued under the Post Office Ordinance:

"Notwithstanding any alternative method of treatment and disposal of prohibited articles authorised by the Post Office Ordinance, 1926, it shall be lawful for the Postmaster General, or any officer of the Post Office General, authorised by him in that behalf, forthwith to destroy any postal packet and the contents thereof which may have been opened under the authority of sections 10, 12 and 13 of the said Ordinance and the contents of which may be any obscene, immoral, indecent, offensive or libellous writing, picture or other thing."

GIFT TO HOSPITALS

London, July 10.
Anonymous gift of £10,000 towards general support of London hospitals was received to-day by King Edward's Hospital Fund.

STARTING ATLANTIC AIRLINE

ANGLO-AMERICAN CO-OPERATION SERVICE IN TWO MONTHS

Washington, July 10.

Well informed authorities state that the Pan-American Airways and the Imperial Airways, American and British firms respectively, have reached an agreement as to a joint trans-Atlantic air service.

It is understood the Pan-American Airways will use Martin flying boats similar to those in use on the Pacific route. There are two alternative routes for the new service, southern and northern. The southern route is by way of Bermuda, and the northern route will be followed in summer and the southern in winter.

The service is to commence in two months.—*United Press*.

OFFICIAL ANNOUNCEMENT

Washington, July 10.
A fast seaplane service will shortly be established between England and the United States under the terms of an agreement, officially announced, between Imperial Airways and Pan-American Airways.

The service will probably start within the next six weeks.—*Reuter*.

OIL CO. WORKERS STRIKE

Mexico City, July 10.

Twelve thousand employees of the British Agula Oil Company have struck work, paralysing nine important producing centres in the State of Vera Cruz.—*Reuter*.

OIL REFINERY FIRE

Willemstad, July 10.

A big fire has broken out at the Royal Dutch-Shell refinery here. Three tanks are ablaze.—*Reuter*.

ADMIRALTY OFFICER DIES

London, July 10.

Sir Oswyn Murray, Permanent Secretary, the Admiralty, died to-day.—*Reuter*.

Two cases of Typhoid were reported to the local Health authorities on Thursday.

DAY BY DAY NEWS IN BRIEF

KINDNESS IS THE GOLDEN CHAIN BY WHICH SOCIETY IS BOUND TOGETHER.—*Gothic*.

Mr. T. Mangharam, Managing proprietor of the Hongkong Silk Store, left to-day by the s.s. Corfu for India.

The forthcoming wedding is announced of Miss Aline Eugenie dite Helene Hamelin, teacher, and Mr. James Phiroozshaw Petrigura, architect, both of Shanghai.

The Religious Discussion Group will meet in the West Lounge at the Y.M.C.A. on Sunday, at 9 p.m., when the Rev. R. W. Carter will speak on "What is China's Greatest Need."

An Indian girl, Therese Sakharai, aged four-and-a-half years, was admitted to the Kowloon Hospital suffering from a fractured skull, caused when she fell from the first floor of her house at 59 Nathan Road.

Emmanuel Roza, a Portuguese lad of 14, residing at 17 Liberty Avenue, has been admitted to the Kowloon Hospital suffering from injuries received when a piece of rock fell on him while he was playing at Kowloon Chi.

His Excellency the Governor has appointed Mr. M. J. Abbott to perform the duties imposed on the Land Officer by section 9 (2) of the Land Registration Ordinance, 1844, during the absence of Mr. W. J. Lockhart-Smith.

BRITANNIA SCUTTLED

KING'S YACHT SUNK IN CHANNEL

Cowes, July 10.

The royal yacht Britannia was scuttled in the Channel off St. Catherine's Point, Isle of Wight, to-day.

The destroyers Amazon and Winchester towed her down the Solent and a time bomb tore a great hole in her hull. The destroyers saluted her as she sank.

The Britannia's end was kept from the public gaze, according to the wishes of the Royal Family.

The late King's sailing master, Sir Philip Hurlstone, Captain A. B. Turner, Mr. A. E. Turner, his mate, and Mr. F. Mason, steward, were the only witnesses of the Britannia's passing besides the personnel of the naval vessels.—*United Press*.

WATER RETURNS

COLONY'S AMPLE SUPPLY CONTINUES IN JUNE

The monthly water returns of the P.W.D. give the total contents of the Island reservoirs at the end of June at 995.32 millions of gallons as against 1,023.55 last year.

The consumption in the City and L.I.I. district during June was 397 million gallons by an estimated population of 437,000, making a rate of 39.3 gallons per head per day. Corresponding figures last year were 292.07 by an estimated population of 424,800 at a rate of 23. These figures include 70.00 million gallons supplied from the Mainland last month, and 25.81 in June 1935.

Contents of the Mainland reservoirs is given at 369.58 million gallons compared with 352.20. The consumption last month was 259.21 million gallons by an estimated population of 325,000 at a rate of 29.6 gallons per head per day as against a consumption in June 1935 of 192.78 by an estimated population 312,500 at a rate of 18.8. Additional water supplied to the Lai-chikok water boat dock last month was 7.69 million gallons.

Kowloon districts enjoyed a constant stream during last month though Hongkong was limited to a 15-hour supply. In June 1935, Hongkong had a six-hour supply up to the 18th, and a 10-hour supply thereafter, whilst Kowloon was restricted to the 18th, enjoying a constant stream thereafter.

Rainfall recorded to the end of June by the Royal Observatory is 24.85 inches as against 25.50 during the first six months of last year.
